Brown,2024-11-15 As we enter the third decade of the 21st century the field of education plays a more crucial role in understanding the contemporary world than ever before Analyzing the role of education in leading and driving change through policy practice and constant innovation for a more inclusive education whether it being educating students or teachers is crucial in the development of new and improved education systems worldwide To this end Frontiers in Education is organizing a series of Research Topics to highlight the latest advancements in the field This editorial initiative led by Dr Gavin Brown Specialty Chief Editor of the Assessment Testing and Applied Measurement section is focused on new insights novel developments current challenges recent advances and future perspectives in the field of assessment in education

**Bioinformatics Analysis of Omics Data for Biomarker Identification in Clinical Research, Volume II** Lixin Cheng,Hongwei Wang,Shibiao Wan,2023-09-05 This Research Topic is part of a series with Bioinformatics Analysis of Omics Data for Biomarker Identification in Clinical Research Volume I <https://www.frontiersin.org/research-topics/13816> bioinformatics analysis of omics data for biomarker identification in clinical research The advances and the decreasing cost of omics data enable profiling of disease molecular features at different levels including bulk tissues animal models and single cells Large volumes of omics data enhance the ability to search for information for preclinical study and provide the opportunity to leverage them to understand disease mechanisms identify molecular targets for therapy and detect biomarkers of treatment response Identification of stable predictive and interpretable biomarkers is a significant step towards personalized medicine and therapy Omics data from genomics transcriptomics proteomics epigenomics metagenomics and metabolomics help to determine biomarkers for prognostic and diagnostic applications Preprocessing of omics data is of vital importance as it aims to eliminate systematic experimental bias and technical variation while preserving biological variation Dozens of normalization methods for correcting experimental variation and bias in omics data have been developed during the last two decades while only a few consider the skewness between different sample states such as the extensive over repression of genes in cancers The choice of normalization methods determines the fate of identified biomarkers or molecular signatures From these considerations the development of appropriate normalization methods or preprocessing strategies may promote biomarker identification and facilitate clinical decision making Nanoscience Research Modules for Pre-Service STEM Teachers Clair T. Berube,Shawn T. Dash,Cindy Thomas-Charles,2019-01-01 STEM science technology engineering and mathematics is a fairly new concept in American education As separate subjects science

and math have been around for a long time but have rarely been taught as a seamless unit of skills rather as discreet content areas This is not how the real world outside of the classroom functions however in actual research laboratories scientists infuse their science with math and their math with science and along with technology and engineering they solve real life problems In practice you cannot separate the various fields as you need all of them in order to discover the underpinnings of the natural world cure a disease or solve a problem with the space rover The American future depends on a scientifically literate workforce armed with knowledge about the laws and theories of science based on empirical facts instead of beliefs In addition there is a shortage of graduates in STEM related disciplines Economic data show that 1 million additional STEM graduates will be needed over the next decade to fill America s economic demand STEM based jobs are expected to grow 17% in the next 10 years outpacing the overall job growth of 10% If teachers across America were trained with fundamental and impending scientific concepts in their science methods courses at the university level scientific literacy can only dramatically improve Nanoscience is one such concept as it is multidisciplinary in nature and is regarded as the basis for innovated technologies in many fields The authors of this book seek to provide pre service and in service science teachers with high quality STEM modules with which to create lesson plans and problem based lessons to use in their future classrooms both at the elementary and secondary level Nanoscience was chosen since its applications reaches across virtually every scientific field from biology to physics and for that matter all STEM domains

**Artificial Intelligence in Digital Pathology Image Analysis** Min Tang,Jialiang Yang,Li Xiao,2024-09-25 Thanks to the development and deployment of whole slide imaging technology in pathology glass slides previously observed under a traditional microscope are now scanned and converted to digital images which are more beneficial for remote access portability and ease of sharing to facilitate telepathology More importantly digitization of glass slides paves the way towards the wide use of artificial intelligence AI tools including machine deep learning algorithms resulting in improved diagnostic accuracy In the past decade a large number of studies have demonstrated the remarkable success of AI particularly deep learning in digital pathology such as tumor region identification metastasis detection and patient prognosis Differing from handcrafted feature based approaches that take advantage of domain knowledge to delineate specific morphological measurements e g nuclei shape and size and tissue texture in the images as features for training deep learning is a paradigm of feature learning entirely driven by the image data and or labels Herein the use of deep learning in pathological diagnosis can not only handle increased workloads and expertise shortages but also obviate subjective diagnosis from pathologists Yet there remain many scientific and technological challenges associated with the efficiency of deep learning algorithms for use in clinical practice For example deep learning requires a sufficient amount of training data for generalization and suffers from a lack of feature interpretability The overarching goal of this special issue is to highlight novel research accomplishments and directions related to advanced AI methodology development and applications in digital pathology

*Invisible Barriers* Stephane

Carcillo,Marie-Anne Valfort,2025-05-27 An essential resource for anyone committed to fostering equality and fairness in employment with actionable proposals for public policy that can address these inequities In a world where discrimination against minorities remains a pressing issue even in economically and socially advanced countries Invisible Barriers delves into the multifaceted nature of this pervasive problem Drawing on extensive research from economics management psychology and sociology St phane Carcillo and Marie Anne Valfort present a comprehensive examination of discriminatory practices in employment and their profound social and economic impacts The first part of the book methodically explores the forms sources and consequences of discrimination in the labor market offering readers a solid understanding of the approaches used to measure and identify discriminatory practices In the second part the book details research findings on specific groups illustrating how discrimination manifests uniquely across different demographics women ethnic minorities older workers LGBTIQ and more From recruitment biases to career advancement hurdles the book sheds light on the varied and often hidden ways that discrimination operates Finally the authors discuss public policies aimed at mitigating discrimination advocating for a multifaceted approach that combines punitive measures with incentives educational programs and communication campaigns to effectively combat biases prejudices and stereotypes

hepatic biliary pancreatic cancer and lose the opportunity of radical surgery few targeted drugs are available Even for the drugs in clinical trial potential drug targets and prognostic biomarkers for hepatic biliary pancreatic cancer are less studied compared to other common cancers such as lung cancer Prognostic biomarker study is the initiation to explore new drug targets and revelation of the underlying mechanisms of tumor progression

**Proceedings of the 6th International Conference on Current Issues in Education (ICCIE) 2023** Paramita Cahyaningrum Kuswandi,Ezi Apino,Syahri Ramadhan,Ririn Susetyaningsih,Siwi Widiastuti,2024-05-18 This is an open access book In this Industrial Era 4.0 society encounters significant environmental economic and social challenges Thus educational institutions need to ensure that all students are well prepared for the future and that they can act as agents of change As a result educational institution must expand their educational system extensively to address these challenges including reshaping teaching and learning notions and platforms that immensely focus on not only developing a broad set of academic staff and student's knowledge skills attitudes and values but also upholding the fast growing technology Building strong learning connections should be perceived as the highest priority in educational institutions The connection paves the way for critical thinking and it is a fundamental concept that connects both context and relevance In this digital information age technology has enormous potential to assist this whole process of connection The 5th International Conference of Current Issues in Education ICCIE 2023 provides platforms for researchers and practitioners to share their ideas and experiences concerning these issues The conference also brings an excellent opportunity to connect with global participants and enhance further collaborations

Emerging Trends in Civil Engineering K. Ganesh Babu,H. Sudarsana Rao,Y. Amarnath,2020-01-11 This book comprises select papers from the International Conference on Emerging Trends in Civil Engineering ICETCE 2018 Latest research findings in different branches of civil engineering such as structural engineering construction materials geotechnical engineering water resources engineering environmental engineering and transportation infrastructure are covered in this book The book also gives an overview of emerging topics like smart materials and structures green building technologies and intelligent transportation system The contents of this book will be beneficial for students academicians industrialists and researchers working in the field of civil engineering

ADVANCES IN MECHANICS AND MATERIALS Sanjaya Kumar Patro,Amar Nath Nayak,Ramakanta Panigrahi,2016-12-09 Veer Surendra Sai University of Technology VSSUT Burla is one among the foremost universities of India in the field of higher education basic and applied research The foundation of this iconic college was laid in 1956 to cater the maintenance and upkeep of the mighty Hirakud Dam world's longest earth dam at Burla The university now has sixteen academic departments in various disciplines in engineering and sciences The International Conference on Advances in Mechanics and Materials ICRAMM 2016 was organized at the Veer Surendra Sai University of Technology Burla Odisha during 17-18 December 2016 Over the years tremendous progress has been made in the fields related to mechanics and materials due to rapid advancements in analytical experimental and computational

facilities The outcome has immensely benefited the industries research and academic organizations in numerous ways The International Conference on Recent Advances in Mechanics and Materials ICRAMM 2016 will provide a common platform for academicians engineers scientists and technologists to come together and discuss the progress made on various aspects of mechanics and materials Realizing the importance of recent developments in the areas of recent advances in mechanics and materials the conference ICRAMM 2016 focuses on following major themes Computational mechanics Experimental mechanics Fluid mechanics Geomechanics Structural mechanics Continuum mechanics Coupled field problems Structural and Soil Dynamics Vibration Control Structural Health Monitoring Rehabilitation and Retrofitting of structures Composite Materials Cement Concrete Composites and Sustainable construction materials The papers included in this conference proceeding reflect in general the need for emerging technologies and growing interest in structural mechanics and materials to tailor it to meet the requirements for the varying application Application of molecular genetics for the diagnosis and classification of rare cancers in surgical pathology Jinping Lai,Ming Zhou,Dengfeng Cao,Ming Zhao,Minghua Ge,2023-08-30

**Sustainable Development of Water Resources and Hydraulic Engineering in China** Wei Dong,Yanqing Lian,Yong Zhang,2018-05-16 This book presents the gatherings of the 2016 International Conference on Water Resource and Hydraulic Engineering which primarily focused on the sustainable development of water resources and the environment in both China and the United States The respective papers cover a wide variety of research areas including watershed hydrology river hydraulics groundwater hydrology water resources management and sustainability development water supply planning under climate change water quality analysis and water pollution sponge city development and urban watershed management environment and sustainability global connections between air and water and irrigation and drainage issues for agricultural engineering The contributions will be of interest to a global readership and highlight the emerging problems facing developing countries as well as research and measures to successfully deal with them and promote a greener and more eco friendly living environment **Advanced Vehicle Control** Johannes Edelmann,Manfred Plöchl,Peter Pfeffer,2016-12-19

The AVEC symposium is a leading international conference in the fields of vehicle dynamics and advanced vehicle control bringing together scientists and engineers from academia and automotive industry The first symposium was held in 1992 in Yokohama Japan Since then biennial AVEC symposia have been established internationally and have considerably contributed to the progress of technology in automotive research and development In 2016 the 13th International Symposium on Advanced Vehicle Control AVEC 16 was held in Munich Germany from 13th to 16th of September 2016 The symposium was hosted by the Munich University of Applied Sciences AVEC 16 puts a special focus on automatic driving autonomous driving functions and driver assist systems integrated control of interacting control systems controlled suspension systems active wheel torque distribution and vehicle state and parameter estimation 132 papers were presented at the symposium and are published in these proceedings as full paper contributions The papers review the latest research developments and practical

applications in highly relevant areas of vehicle control and may serve as a reference for researchers and engineers
