Twenty Years of Education Transformation in Gauteng 1994 to 2014 Felix Maringe,Martin Prew,2015-05-05

Twenty Years of Education Transformation in Gauteng 1994 to 2014 An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994 These essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects Each essay is written by one or more specialist in the relevant focus area The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially There has been no attempt to fit the books chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Educations present and past We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years

Research for Educational Change Jill Adler,Anna Sfar,2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

 at different universities and other academic institutions in the Nordic countries It provides insight into the diversity of
 research being conducted in the northernmost parts of Europe Although it would be incorrect to assert that research in this
 far away part of Europe represents something drastically different than that done in other parts of the world it would be
 equally incorrect to maintain that being at the outskirts on the cusp or on the periphery _ whichever way one wishes to
 describe the position of the Nordic countries in relation to the rest of the world does not influence the ways in which
 educational processes phenomena and their consequences are viewed These sixteen Nordic Voices discuss with readers
 different issues regarding teaching and researching Comparative and International Education in the Nordic countries The
