Energy and Water Development Appropriations for 2016 United States. Congress. House. Committee on Appropriations. Subcommittee on Energy and Water Development,2015 **Speaking Truths** Valerie Chepp,2022-02-11 The twenty first century is already riddled with protests demanding social justice and in every instance young people are leading the charge But in addition to protesters who take to the streets with handmade placards are young adults who engage in less obvious change making tactics In *Speaking Truths* sociologist Valerie Chepp goes behind the scenes to uncover how spoken word poetry and young people s participation in it contributes to a broader understanding of contemporary social justice activism including this generation s attention to the political importance of identity well being and love Drawing upon detailed observations and in depth interviews Chepp tells the story of a diverse group of young adults from Washington D C who use spoken word to create a more just and equitable world Outlining the contours of this approach she interrogates spoken word activism s emphasis on personal storytelling and truth the strategic uses of aesthetics and emotions to politically engage across difference and the significance of healing in sustainable movements for change Weaving together their poetry and personally told stories Chepp shows how poets tap into the beautiful emotional personal and therapeutic features of spoken word to empathically connect with others advance intersectional and systemic analyses of inequality and

make social justice messages relatable across a diverse public By creating allies and forging connections based on friendship professional commitments lived experiences emotions artistic kinship and political views this activist approach is highly integrated into the everyday lives of its practitioners online and face to face Chepp argues that spoken word activism is a product of and a call to action against the neoliberal era in which poets have come of age characterized by widening structural inequalities and increasing economic and social vulnerability She illustrates how this deeply personal and intimate activist approach borrows from builds upon and diverges from previous social movement paradigms Spotlighting the complexity and mutual influence of modern day activism and the world in which it unfolds Speaking Truths contributes to our understanding of contemporary social change making and how neoliberalism has shaped this political generation s experiences with social injustice **Flamenco on the Global Stage** K. Confessions of a School Reformer Larry Cuban, 2022-10-18

In *Confessions of a School Reformer*, eminent historian of education Larry Cuban reflects on nearly a century of education reforms and his experiences with them as a student, educator, and administrator. Cuban begins his own story in the 1930s when he entered first grade at a Pittsburgh public school, the youngest son of Russian immigrants who placed great stock in the promises of education. With a keen historian's eye, Cuban expands his personal narrative to analyze the overlapping social, political, and economic movements that have attempted to influence public schooling in the United States since the beginning of the twentieth century. He documents how education both has and has not been altered by the efforts of the Progressive Era of the first half of the twentieth century, the Civil Rights Movement of the 1950s through the 1970s, and the standards-based school reform movement of the 1980s through today. Cuban points out how these dissimilar movements nevertheless shared a belief that school change could promote student success and also forge a path toward a stronger economy and a more equitable society. He relates the triumphs of these school reform efforts as well as more modest successes and unintended outcomes. Interwoven with Cuban's evaluations and remembrances are his confessions in which he accounts for the beliefs he held and later rejected as well as mistakes and areas of weakness that he has found in his own ideology. Ultimately, Cuban remarks with a tempered optimism on what schools can and cannot do in American democracy.

'History Wars' and Reconciliation in Japan and Korea Michael Lewis, 2016-11-14

This book provides a fresh approach to understanding the origins and possible future direction of the Northeast Asia history wars. Leading scholars in history, literary studies, and education present the complex issue in a historical context by assessing its political and cultural dimensions, particularly with regards to relations between Japan and Korea. Their essays also touch on the significance of civil society efforts to advance peaceful reconciliation and the social and political forces that have worked to frustrate such efforts since 1945. At its core, this volume explores the political significance in the gap between Korean and Japanese civil society versus governmental efforts to resolve issues lingering from the Pacific War in Asia, the significance of cultural as well as political efforts to understanding historical and contemporary relations among Northeast Asian neighboring states, and specific factors such as textbook reform, revised school curricula, and civil society education efforts that are working to ameliorate the heretofore deadlocked history wars.
