Against Creative Writing Andrew Cowan, 2022-09-13 The rise of Creative Writing has been accompanied from the start by two questions can it be taught and should it be taught This scepticism is sometimes shared even by those who teach it who often find themselves split between two contradictory identities the artistic and the academic Against Creative Writing explores the difference between writing which is what writers do and Creative Writing which is the instrumentalisation of what writers do Beginning with the question of whether writing can or ought to be taught it looks in turn at the justifications for BA MA and PhD courses and concludes with the divided role of the writer who teaches It argues in favour of Creative Writing as a form of hands on literary education at undergraduate level and a form of literary apprenticeship at graduate level especially in widening access to new voices It argues against those forms of Creative Writing that lose sight of literary values as seen in the proliferation of curricular couplings with non literary subjects or the increasing emphasis on developing skills for future employment Against Creative Writing written by a writer is addressed to other writers inside or outside the academy at undergraduate or graduate level whether creative or critical Primary Science Education in East Asia Yew-Jin Lee, Jason Tan, 2018-09-26 This edited volume is a state of the art comparison of primary science education across six East Asian regions namely the People's Republic of China Republic of Korea Republic of China Hong Kong SAR Japan and Singapore While news of educational policies classroom teaching assessment and other educational innovations here often surface in the international media this book brings together for the first time relevant information regarding educational systems and strategies in primary science in East Asia Above all it is a readable yet comprehensive survey readers would have an accurate sense of what has been accomplished what has not worked so well and what remains to be done Invited experts in comparative education research and or science education also provide commentary by discussing common themes across the six regions These types of critical synoptic reviews add much value by enabling readers to understand broad

commonalities and help synthesize what must surely be a bewildering amount of very interesting albeit confusing body of facts issues and policies Education in East Asia holds many lessons both positive and negative to offer to the rest of the world to which this volume is a timely contribution to the literature
