International Guide to Student Achievement John Hattie, Eric M. Anderman, 2013-01-17 The International Guide to Student Achievement brings together and critically examines the major influences shaping student achievement today There are many often competing claims about how to enhance student achievement raising the questions of What works and What works best World renowned bestselling authors John Hattie and Eric M Anderman have invited an international group of scholars to write brief empirically supported articles that examine predictors of academic achievement across a variety of topics and domains Rather than telling people what to do in their schools and classrooms this guide simply provides the first ever compendium of research that summarizes what is known about the major influences shaping students academic achievement around the world Readers can apply this knowledge base to their own school and classroom settings The 150 entries serve as intellectual building blocks to creatively mix into new or existing educational arrangements and aim for quick easy reference Chapter authors follow a common format that allows readers to more seamlessly compare and contrast information across entries guiding readers to apply this knowledge to their own classrooms their curriculums and teaching strategies and their teacher training programs *South African Schooling: The Enigma of Inequality* Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that

without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI Education in a New South Africa Robert J. Balfour,2015-09-24 A collaborative series with the University of Cambridge Faculty of Education highlighting leading edge research across Teacher Education International Education Reform and Language Education How South Africa Works Jeffrey Herbst,Greg Mills,2015-07-01 The overwhelming challenge that South Africa faces and has to date failed to address is unemployment which falls especially on African youths who were promised a better future after 1994 If the current unemployment challenge is not addressed it will be impossible to sustainably lift many millions of people out of poverty How South Africa Works reviews the country s major economic achievements over the past two decades Through numerous interviews with politicians business leaders and analysts it examines the challenges and opportunities across key productive sectors including agriculture manufacturing services and mining illustrative of the policy challenges that leaders face It scrutinises the social grant and education systems to understand if South Africa has established mechanisms for people not only to escape destitution but be ready to be employed and identifies steps that some of South Africa s most notable entrepreneurs have taken to build world class enterprises Recognising the essential challenge to cultivate more employers to employ people How South Africa Works concludes by offering an agenda and active steps for greater competitiveness for government business and labour **South African Journal of Psychology** ,1998 **Proceedings of the 13th International Congress on Mathematical Education** Gabriele Kaiser,2017-10-31 This book is open access under a CC BY 4 0 license The book presents the Proceedings of the 13th International Congress on Mathematical Education ICME 13 and is based on the presentations given at the 13th International Congress on Mathematical Education ICME 13 ICME 13 took place from 24th 31st July 2016 at the University of Hamburg in Hamburg Germany The congress was hosted by the Society of Didactics of Mathematics Gesellschaft f r Didaktik der Mathematik GDM and took place under the auspices of the International Commission on Mathematical Instruction ICMI ICME 13 brought together about 3 500 mathematics educators from 105 countries additionally 250 teachers from German speaking countries met for specific activities Directly before the congress activities were offered for 450 Early Career Researchers The proceedings give a comprehensive overview on the current state of the art of the discussions on mathematics education and display the breadth and deepness of current research on mathematical teaching and learning processes The book introduces the major activities of ICME 13 namely articles from the four plenary lecturers and two plenary panels articles from the five ICMI awardees reports from six national presentations three reports from the thematic afternoon devoted to specific features of ICME 13 Furthermore the proceedings contain descriptions of the 54 Topic Study Groups which formed the heart of the congress and reports from 29

Teaching Mathematics in Multilingual Classrooms J.B. Adler, 2005-12-21 Increasingly teachers all over the world are grappling on a daily basis with the fact of multilingual classrooms In this book Jill Adler captures three inter related dilemmas that lie at the heart of teaching mathematics in multilingual classrooms Adler's identification and naming of the dilemma of code switching the dilemma of mediation and the dilemma of transparency arise from exploring the realities of actual classrooms and are shaped by a perspective of teaching as a social practice Adler provides a sharp analysis and strong theoretical grounding for her work pulling together research related to the relationship between language and mathematics communicating mathematics and mathematics in bi

multilingual settings In so doing she offers a direct challenge to dominant research on communication in mathematics classrooms that has othered the multilingual setting in its normalisation of the monolingual classroom The norm is a multicultural one Set in contemporary South Africa a context of linguistic diversity and rapid change this book offers a spotlight whose beam is wide enough to illuminate dilemmas at work in all mathematics classrooms

Twenty Years of Education Transformation in Gauteng 1994 to 2014 Felix Maringe,Martin Prew,2015-05-05 Twenty Years of Education Transformation in Gauteng 1994 to 2014 An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994 These essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects Each essay is written by one or more specialist in the relevant focus area The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially There has been no attempt to fit the books chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Educations present and past We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years

Researching Possibilities in Mathematics, Science and Technology Education Mamokgethi Setati,2009 Mathematics Science and Technology Education MSTE emerged as a research discipline in the 1960s and continues to reflect the distinctive flavour and character of its roots in Western societies and science In this mode often based on positivist frameworks research environments are characterised by idealised environments sanitised research conditions depoliticised neutralised data and contested analyses The book arises from needs in the mathematics and science education research community in Southern Africa for a methodology text that is responsive to rapidly changing educational environments and to the challenges and possibilities of research in contexts characterised by inequality diversity poverty violence the particular history within which research takes place and the consequent ethical and socio political considerations The book also acknowledges and works with the practical and political realities of education and schooling in much of Southern Africa where schools are often poorly resourced and communication with them is often difficult and where research methodologies and ethics have to take account of the complexities of school operations and school community relationships The book does not aim to position itself as a counterpoint to conventional research methodologies It aims to build on the established base of mainstream MSTE and seeks to elevate and widen the debates raise methodological issues and offer innovative possibilities and pedagogies To this end the chapters present theoretical meta level reflections on issues in research design in the fields of mathematics science and technology education In this shift of focus the book draws on a number of fairly recent research approaches These include ethno mathematics
