West,Ludger Woessmann,2021-04-27

Comparative analyses of the influence of public opinion on education policy in developed countries Although research has suggested a variety of changes to education policy that have the potential to improve educational outcomes politicians are often reluctant to implement such evidence based reforms Public opinion and pressure by interest groups would seem to

have a greater role in shaping education policy than insights drawn from empirical data The construction of a comparative political economy of education that seeks to explain policy differences among nations is long overdue This book offers the first comparative inventory and analysis of public opinion and education in developed countries drawing on data primarily from Europe and the United States

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Fossil Energy Update, 1976 Fortune Tellers Walter A Friedman, 2013-11-28 A gripping history of the pioneers who sought to use science to predict financial markets The period leading up to the Great Depression witnessed the rise of the economic forecasters pioneers who sought to use the tools of science to predict the future with the aim of profiting from their forecasts This book chronicles the lives and careers of the men who defined this first wave of economic fortune tellers men such as Roger Babson Irving Fisher John Moody C J Bullock and Warren Persons They competed to sell their distinctive methods of prediction to investors and businesses and thrived in the boom years that followed World War I Yet almost to a man they failed to predict the devastating crash of 1929 Walter Friedman paints vivid portraits of entrepreneurs who shared a belief that the rational world of numbers and reason could tame or at least foresee the irrational gyrations of the market Despite their failures this first generation of economic forecasters helped to make the prediction of economic trends a central economic activity and shed light on the mechanics of financial markets by providing a range of statistics and information about individual firms They also raised questions that are still relevant today What is science and what is merely guesswork in forecasting What motivates people to buy forecasts Does the act of forecasting set in motion unforeseen events that can counteract the forecast made Masterful and compelling Fortune Tellers highlights the risk and uncertainty that are inherent to capitalism itself *Literacy in the*

Milton, 2014-04-01 Much of the current debate about education too often resembles the blind men describing an elephant apprehending only a particular part of the situation or the process many analysts tell an evocative but incomplete story The so called reform discussion proceeds with a lack of depth about the nuances and realistic limitations in the institutional order

of school This book argues that as regulation of schools moves further up the bureaucratic hierarchy first to state departments of education then to the national department of education the legal and institutional requirements get more intensive but less concretely useful in class rooms This bureaucratization serves to tighten the organizational environment thereby increasing the risk of normal accidents The increasing governmental management in other words makes it more likely that schools will fail to meet their goals Analyses of education are too often developed for public consumption in a fast moving political world This book examines some of the deeper organizational reasons why things don t work so well in school as well as a look at some of things that do work Most importantly the book will explain how the social and cultural expectations of what schools can do may create unrealistic hopes We as a society and schools as institutions embrace these unreasonably high hopes at our collective peril Check out Andrew s latest interview with Seattle Radio <http://kiroradio.com> listen 9972862
