The Effect of "resource Impact Factors" on Energy Conservation Standards for Buildings Stephen F. Weber,1978 Resources in Education ,1991-10 **Use of Extraterrestrial Resources for Human Space Missions to Moon or Mars** Donald Rapp,2012-11-28 This book carries out approximate estimates of the costs of implementing ISRU on the Moon and Mars It is found that no ISRU process on the Moon has much merit ISRU on Mars can save a great deal of mass but there is a significant cost in prospecting for resources and validating ISRU concepts Mars ISRU might have merit but not enough data are available to be certain In addition this book provides a detailed review of various ISRU technologies This includes three approaches for Mars ISRU based on processing only the atmosphere solid oxide electrolysis reverse water gas shift reaction RWGS and absorbing water vapor directly from the atmosphere It is not clear that any of these technologies are viable although the RWGS seems to have the best chance An approach for combining hydrogen with the atmospheric resource is chemically very viable but hydrogen is needed on Mars This can be approached by bringing hydrogen from Earth or obtaining water from near surface water deposits in the soil Bringing hydrogen from Earth is problematic so mining the regolith to obtain water seems to be the only way to go This will require a sizable campaign to locate and validate useable water resources Technologies for lunar ISRU are also reviewed even though none of them provide significant benefits to near term lunar missions These include oxygen from lunar regolith solar wind volatiles from regolith and extraction of polar ice from permanently shaded craters **Developing The Environment C** Barrow,2014-09-19 This book presents a comprehensive overview of global environmental problems past present and future examining their roots and implications and suggesting where possible ways in which they might be mitigated or avoided by careful management **Proceedings of University Seminar on Pollution and Water Resources** Columbia University. University Seminar on Pollution and Water Resources,1975 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1973 **NBS Building Science Series** ,1974 **Measurement of Human Resources** W. T. Singleton,P. Spurgeon,2017-06-26 The issue of physical resources is one of considerable interest in the field of human resource management but the solution to such difficulties must depend upon the skills and enterprise of those in positions of management The purpose of this book first published in 1975 is to focus upon these skills and upon the issues involved in examining the utilisation of human resources The concept of human resources is an extremely broad one and there are many relevant disciplines Each discipline provides information with respect to monitoring developing or utilising the human resource The set of papers in this volume will provide a source of reference for a wide range of research worker practitioners and students in the total sphere of human resources as well as within the various disciplines represented *Assessing Aesthetic Attributes in Planning Water Resources Projects* National Research Council (U.S.). Environmental Studies Board,1982 **Handbook of International Human Resource Management** Paul Sparrow,2010-12-03 From the mid

1980s to the turn of the 1990s the international HR field was considered to be in its infancy. There continues to be both an evolution of territory covered by the field as a series of successively evolving cultural, geographical and institutional challenges faced by the multinational corporation (MNC) as well as more critical questioning whether this has created an expanded or a fragmented field. This book brings together the latest research on important issues driven concerns that the field of IHRM now has to face, absorb, interpret, then reanalyse through international lenses. This volume gives attention to those aspects of MNC behaviour: choices about location; how they organize local subsidiaries; choices made about technology, capital and labour; and choices made about investments and strategies that are subject to institutional influences. It also gives voice to a number of contemporary issues: reverse knowledge flows; skill supply strategies; employer branding; enablement; outsourcing; global networks that now need to be accommodated within the field. Broadens the IHRM field to cover comparative and institutional perspectives. Provides a multi level analysis of globalization phenomena at the individual, organization and macro level. Focuses on the current problems and issues driving the attention of IHRM Directors.
