

## User Guide

## Keypad Features

## DISPLAY

The keypad features a three-digit numeric display for zone identification and pre-designated English-language prompts (e.g., "ALARM," "AWAY," "STAY," "CHECK," etc.) for indicating system status. (Refer to Figure 1.)

## FUNCTION KEYS

The function keys are located behind a decorative door and are continuously backlit for ease in use. (Refer to the User's Guide provided with the control panel for detailed instructions on the use of these keys.)

The function keys include keys for panic alarm activation. The panic alarms are activated by pressing key pairs [1] & [\*], [3] & [#], or [\*] & [#], or a Special Function Key (see below). Whether these panic keys function and the type of panic alarms they produce is determined by the control panel's capability and programming. (Check with your installer for the further information regarding these keys.)

## SOUNDER

The sounder is a piezo-electric sounder that pulses for fire alarms and generates a two-tone sound for burglary and audible panic alarms.

## KEYPAD LEDs

The keypad contains two LEDs that indicate the status of the system as follows:

| LED           | Function                                                             |
|---------------|----------------------------------------------------------------------|
| Green (Ready) | Lights when the system is ready to arm (no zone faults are present). |
| Red (Armed)   | Lights when the system is armed.                                     |

## SPECIAL FUNCTION KEYS

These are four keys located to the left of the numeric keys (refer to Figure 1). The keys may be programmed by your installer for panic alarms or other special functions such as macros (a frequently used series of key entries). **Function keys must be held down for at least 2 seconds to activate an alarm.** (Check with your installer for the programmed function of these keys.)
