THE Journal ,2005 **Helping Students Learn in a Learner-Centered Environment** Terry Doyle,2023-07-03

Before entering higher education most students learning experiences have been traditional and teacher centered Their teachers have typically controlled their learning with students having had little say about what and how to learn For many students encountering a learner centered environment will be new possibly unsettling and may even engender resistance and hostility Taking as his starting point students attitudes toward and unfamiliarity with learner centered classrooms Terry Doyle explains that motivating students to engage with this practice first of all requires explaining its underlying rationale and then providing guidance on how to learn in this environment This book is about how to help students acquire the new skills and knowledge they need to take on unfamiliar roles and responsibilities It is informed by the author s extensive experience in managing learner centered classes and by his consultation work with faculty The first four chapters focus on the importance of imparting to students the evidence and underlying philosophy that is driving higher education to move from a teacher centered to a learner centered practice and what this means for students in terms of having control over and making important choices about their learning The final eight chapters focus on how to impart the skills that students need to learn or hone if they are to be effective learners in an environment that is new to them The book covers such practices as learning on one s own creating meaningful learning when collaborating with others peer teaching making presentations developing life long learning skills self and peer evaluation and give meaningful feedback This book provides a rich and informative answer to the fundamental question how do I help my students adjust to a learner centered practice **Mobile**

About the Author: Jennifer Elyse Schneid is a former mathematics professor teaching all levels of math at three community colleges for seventeen years. She also taught high school math for a year and tutored students at every level and subject of math from kindergarten through college undergraduate level. She is now running a math tutoring center. She has formally taught all math topics from Prealgebra through Calculus 3 and contributed content to math textbooks and other publications. Her favorite topics to teach are College Algebra, Trigonometry, Precalculus, and the Calculus sequence. She firmly believes every single person can learn math, but many need to be provided with proper motivation, instruction that incorporates their learning styles, and relevance to their lives for them to be successful. She hopes this guide helps math teachers everywhere so they can be the ones who help and inspire math students everywhere to gain confidence with and understanding of the wonders of mathematics.

Jennifer is also a young adult author and she is working on her sixth book, a sci-fi romance thriller about nanotechnology. In her free time, she follows architecture, gymnastics, and dance and enjoys spending time with her husband and two dogs, one named Archimedes after her favorite mathematician.
