 mostly to make a visual statement but that wasn t always the case In the late 1930s roadsters were considered to be real hot  
 rods while sedans and coupes were not considered to be race cars Over time sanctioning bodies began to accept sedans and  
 coupes as race cars which created the need for chopping tops When competing in dry lakes racing the tall birdcages of cars  
 that had not been chopped created an excessive amount of aerodynamic drag Chopping the top increased the aerodynamic  
 efficiency to the point that the coupes were competitive with the roadsters Tops aren t often chopped for those reasons today  
 However when viewing the works of art that have been created by the best chopping masters it s clear that enhanced  
 aesthetics is the only reason that is needed Chopping a top may seem simple at first especially if you think that old tops are
