Hispanic Contact Linguistics Luis A. Ortiz López, Rosa E. Guzzardo Tamargo, Melvin González-Rivera, 2020-02-14 This volume comprises cutting edge research on language contact and change. The chapters present a wide scope of settings in which Spanish is in contact with other languages such as Catalan, English and Quechua, a large breadth of geographical areas e.g. United States, Puerto Rico, Colombia, Brazil, Argentina and varied participant groups ranging from dialect contacts, second language learners and heritage speakers to balanced bilinguals and code switchers. Taken together, the chapters provide rich empirical descriptions of data pertaining to different levels of language diversity, naturalistic and experimental methodological approaches to data collection as well as theoretical implications of the findings. The interdisciplinary perspective adopted by the authors contributes to the linguistic analysis and offers important insights into theoretical linguistics in general and into theories of sociolinguistics, language variation, bilingualism and second language acquisition.

The Next Phase in Heritage Language Studies: Methodological Considerations and Advancements Fatih Bayram, Maki Kubota, Sergio Miguel Pereira Soares, 2024-03-27 Over the past three decades, studies investigating heritage speaker (HS) linguistic competencies have shown time and again that despite being L1 or 2L1 native speakers of their home language, HS outcomes display variation across a wide spectrum of differences as compared to each other, other types of bilinguals as well as their monolingual peers. Studies have traditionally used mostly behavioral methodologies rooted in adjacent established fields e.g. L1 acquisition, adult L2 acquisition, offering in addition to documenting and describing HS performance, important insights for linguistic theory and challenges related to home minority language maintenance, contact policy and more. A birds-eye view makes it clear that the methodologies one uses to tap into HSs' linguistic knowledge areas, if not more, are important than the phenomena under investigation, especially in light of how their unique experiences with their heritage and other languages are present across a continuum.
