

Chapter 1 The Study of Human Development

1. StudySmart: Domains of Development, Nature/Nurture.

There are three Domains of Development and these are as follows: Physical Development, Cognitive Development, and Psychosocial Development. The three major domains can also be called as aspects of development. Nature and nurture can both be major influences for human development.

2. Typical major developments in periods of human development.

Prenatal Period (conception to birth)

Physical Development: Basic body structures and organs form; brain growth spurt begins.

Cognitive Development: Abilities to learn and remember and to respond to sensory stimuli are developing.

Psychosocial Development: Fetus responds to mother's voice and develops a preference for it.

Infancy and Toddlerhood (birth to age 3)

Physical Development: The brain grows in complexity and is highly sensitive to environmental influence; Physical growth and development of motor skills are rapid.

Cognitive Development: Abilities to learn and remember are present, even in early weeks.

Psychosocial Development: Self-awareness develops; Shift from dependence toward autonomy occurs.

Early Childhood (ages 3 to 6)

Physical Development: Growth is steady; appearance becomes more slender and proportions more adultlike.
