religious studies and geography      **Identity** Gerald Izenberg, 2016-03-30 Identity The Necessity of a Modern Idea is the first comprehensive history of identity as the answer to the question who or what am I It covers the century from the end of World War I when identity in this sense first became an issue for writers and philosophers to 2010 when European political leaders declared multiculturalism a failure just as Canada which pioneered it was hailing its success Along the way the book examines Erik Erikson s concepts of psychological identity and identity crisis which made the word famous the turn to collective identity and the rise of identity politics in Europe and America varieties and theories of group identity debates over accommodating collective identities within liberal democracy the relationship between individual and group identity the postmodern critique of identity as a concept and the ways it nonetheless transformed the social sciences and altered our ideas of ethics At the same time the book is an argument for the validity and indispensability of identity properly understood Identity was not a concept before the twentieth century because it was taken for granted The slaughter of World War I undermined the honored identities of prewar Europe and as a result the idea of identity as something objective and stable was thrown into question at the same time that people began to sense that it was psychologically and socially necessary We can t be at home in our bodies act effectively in the world or interact comfortably with others without a stable sense of who we are Gerald Izenberg argues that while it is a mistake to believe that our identities are givens that we passively discover about ourselves decreed by God destiny or nature our most important identities have an objective foundation in our existential situation as bodies social beings and creatures who aspire to meaning and transcendence as well as in the legitimacy of our historical particularity      *Reasons of Identity* Avigail Eisenberg, 2009-08-27 The current legal and political context is perhaps more congenial than ever before to considering claims made by minorities for the protection of some aspect of their identity This book argues that diverse societies depend for their success on having courts and legislatures which are capable of assessing these identity claims in a fair and transparent manner Despite the ubiquity of these claims today how public decision makers assess minority identity claims in the course of decision making is only vaguely understood and mostly ignored in normative political theory and public policy analysis This book examines several key approaches used by national and international institutions to assess the identity claims of religious cultural and Indigenous minorities today It takes up the central challenges to the public assessment of identity claims which raise concerns about the incommensurability and questionable authenticity of such claims and about the risks of essentializing and domesticating the identities of the people who advance identity claims It develops a guide to aid in the fair assessment of identity claims which is grounded on the requirements that public institutions must respect what people claim is deeply important to their self understandings and ways of life without merely accepting such claims at face value or deferring to claimants in every case and public institutions must have the capacity to reflect on their own unfair biases The guide developed in this book aims at interrogating the strength of any identity claim on bases that are respectful of differences without being blinded by them

*Promoting Conflict or Peace through Identity* Nikki R. Slocum-Bradley, 2016-04-15 Developing a solid basis for future research and training this illuminating volume facilitates peace and mutual understanding between people by addressing a root cause of social conflicts identity constructions The volume encompasses eight revealing empirical case studies from regions throughout the world conducted by experts from diverse disciplinary backgrounds Each case study examines how identities are being constructed and used in the region how these identities are related to borders and in what ways identity constructions foment peace or conflict The volume summarizes insights gleaned from these studies and formulates an analytical framework for understanding the role of identity constructions in conflict or peace     **Policing Wars** Caroline Holmqvist, 2016-06-15 Holmqvist presents an original account of the relationship between war and policing in the twenty first century This interdisciplinary study of contemporary Western strategic thinking reveals how why and with what consequences the wars in Afghanistan and Iraq became seen as policing wars     United States Foreign Policy & National Identity in the 21st Century Kenneth Christie, 2008-09-05 Examines the complex relationship between United States foreign policy and American national identity as it has changed from the post cold war period through the defining moment of 9 11 and into the 21st century Starting with a discussion of notions of American identity in an historical sense the contributors go on to examine the most central issues in US foreign policy and their impact on national identity including the end of the Cold War the rise of neo conservatism ideas of US Empire and the influence of the War on Terror The book sheds significant new light on the continuities and discontinuities in the relationship of US identity to foreign policy     Identity Politics David Pilgrim, 2022-06-29 Identity politics have taken a strong hold on modern society in particular online on social media platforms But to what extent have they contributed to human flourishing Have they changed the world for the better and to what extent David Pilgrim explores identity politics as a curate s egg good and bad in parts The good that they shine light on topics that may previously have been neglected The bad their tendency towards absolutism and premature certainties The world is nuanced and contradictory and our awareness of it is highly partial Identity politics are an inadequate response to that complexity and mystery of life They take away the need to give free expression to all views including those we may not only disagree with but might also find offensive Pilgrim re establishes a realist objection to strong social constructivist arguments within social science about gender sexualities and putative moral panics This accessible book is a must read for anyone with an interest in contemporary policy formation or reform It will appeal to students and professionals from the fields of sociology politics social policy social work philosophy mental health and public health could use this book     **Radicalization in Western Europe** Carolin Görzig, Khaled Al-Hashimi, 2014-09-15 Employing a theoretical framework based on the concept of identity loss this book seeks to understand why increased integration has stimulated greater radicalization among the Muslim populations in Western Europe Through extensive field research in four European countries the UK the Netherlands Germany and France the authors investigate three key questions 1 Why are 2nd and 3rd generations of Muslims in Europe

more radical than their parents 2 Why does Europe experience more home grown terrorism today than thirty or forty years ago 3 Why do some European countries feature more radical Muslim communities than others The book reveals that these three puzzling questions can be solved when analyzing the loss of individuality in the face of integration and identification with European society While Individualist and structural approaches fail to explain radicalization of Muslims in Europe this study by framing radicalization through coupling the public discourse with identity loss provides a much needed insight into the process of radicalization Explaining radicalization and gaining an understanding of the drivers of radicalization is crucial to prevent and mitigate intercultural alienation to further develop immigration policies redress integration failures as well as to avoid dangerous oversimplifications This book contributes not only to understanding why greater integration is matched by increasing radicalization but its insights also contribute to developing ideas about how radicalization can be prevented or overcome and integration policies can be enhanced This book will be of much interest to students of terrorism and counter terrorism radical Islam war and conflict studies European politics IR and security studies

**Identity, Ethics, and Nonviolence in Postcolonial Theory** S. Abraham, 2007-04-30 Abraham argues that a theological imagination can expand the contours of postcolonial theory through a reexamination of notions of subjectivity gender and violence in a dialogical model with Karl Rahner She questions of whether postcolonial theory with its disavowal of religious agency can provide an invigorating occasion for Catholic theology

**Narrative and the Politics of Identity** Phillip L. Hammack, 2011 Since the late nineteenth century Jews and Arabs have been locked in an intractable battle for national recognition in a land of tremendous historical and geopolitical significance While historians and political scientists have long analyzed the dynamics of this bitter conflict rarely has an archeology of the mind of those who reside within the matrix of conflict been attempted This book not only offers a psychological analysis of the consequences of conflict for the psyche it develops an innovative compelling and cross disciplinary argument about the mutual constitution of culture and mind through the process of life story construction But the book pushes boundaries further through an analysis of two peace education programs designed to fundamentally alter the nature of young Israeli and Palestinian life stories Hammack argues that these popular interventions rooted in the idea of prejudice reduction through contact and the cultivation of cosmopolitan

identities are fundamentally flawed due to their refusal to deal with the actual political reality of young Israeli and Palestinian lives and their attempt to construct an alternative narrative of great hope but little resonance for Israelis and Palestinians Grounded in over a century of literature that spans the social sciences Hammack's analysis of young Israeli and Palestinian lives captures the complex dynamic relationship among politics history and identity and offers a provocative and audacious proposal for psychology and peace education

**Rhetoric and Religious Identity in Late Antiquity** Richard Flower, Morwenna Ludlow, 2020-08-31 The topic of religious identity in late antiquity is highly contentious How did individuals and groups come to ascribe identities based on what would now be known as religion categorizing themselves and others with regard to Judaism Manichaeism traditional Greek and Roman practices and numerous competing conceptions of Christianity How and why did examples of self identification become established activated or transformed in response to circumstances To what extent do labels whether ancient and modern for religious categories reflect a sense of a unified and enduring social or group identity for those included within them How does religious identity relate to other forms of ancient identity politics for example ethnic discourse concerning barbarians Rhetoric and Religious Identity in Late Antiquity responds to the recent upsurge of interest in this issue by developing interdisciplinary research between classics ancient and medieval history philosophy religion patristics and Byzantine studies expanding the range of evidence standardly used to explore these questions In exploring the malleability and potential overlapping of religious identities in late antiquity as well as their variable expressions in response to different public and private contexts it challenges some prominent scholarly paradigms In particular rhetoric and religious identity are here brought together and simultaneously interrogated to provide mutual illumination in what way does a better understanding of rhetoric its rules forms practices enrich our understanding of the expression of late antique religious identity How does an understanding of how religious identity was ascribed constructed and contested provide us with a new perspective on rhetoric at work in late antiquity

**Youth Identity, Politics and Change in Contemporary Kurdistan** Shivan Fazil, Bahar Baser, 2021-09-01 Today's youth are challenging the older political class around the world and are forming new political generations Examples from South Africa and elsewhere where peace processes were deemed to be

successful show signs of youth disapproval of the current post conflict conditions Moreover the Arab Spring witnessed numerous youth movements emerge in authoritarian and illiberal contexts This book was prepared in light of these discussions and aims to contribute to these ongoing debates on youth politics by presenting the situation of youth in the Kurdistan Region of Iraq KRI as a case study It will be the first book that specifically focuses on the Iraqi Kurdish youth and their political social and economic participation in Kurdistan The contemporary history of the KRI is marked by conflict war and ethnic cleansing under Saddam Hussein and the tyranny of the Ba ath regime significantly affecting the political situation of the Kurds in the Middle East Most of the recent academic literature has focused on the broader picture or in other words the macro politics of the Kurdish conundrum within Iraq and beyond There is little scholarship about the Kurdish population and their socio economic conditions after 2003 and almost none about the younger generation of Kurds who came of age during autonomous Kurdish rule This is a generation that unlike their forebears has no direct memory of the decades long campaigns of repression Studying and examining the rise of this generation of Kurdish young millennials Generation 2000 who came of age in the aftermath of the United States invasion of Iraq offers a unique approach to understand the dynamics in a region that underwent a substantial socio political transformation after 2003 as well as the impact of these developments on the youth population Pursuing different themes and lines of inquiry the contributors of the book analyze the challenges and opportunities for young men and women to fulfil their needs and desires and contribute to the ongoing quest for nationhood and nation building In this book our aim is to bring together a variety of perspectives from local and foreign academics who have been working on pressing issues in Kurdistan and beyond The chapters focus on an array of themes particularly including political participation political situation and change religiosity and extremism Taken together the chapters provide us with an introduction to youth politics in Kurdistan This book is just the first attempt to open academic and nonacademic debate on this subject at a time when protests around youth related issues are becoming a more prevalent method of political engagement in the region Our hope is that more research follows and supplements what has not been addressed in this book especially through the introduction of first hand youth perspectives to the core of this analysis and giving them a voice in nonviolent platforms
