**Handbook of Research on Disease Prediction Through Data Analytics and Machine Learning** Rani, Geeta,Tiwari, Pradeep Kumar,2020-10-16 By applying data analytics techniques and machine learning algorithms to predict disease medical practitioners can more accurately diagnose and treat patients However researchers face problems in identifying suitable algorithms for pre processing transformations and the integration of clinical data in a single module as well as seeking different ways to build and evaluate models The Handbook of Research on Disease Prediction Through Data Analytics and Machine Learning is a pivotal reference source that explores the application of algorithms to making disease predictions through the identification of symptoms and information retrieval from images such as MRIs ECGs EEGs etc Highlighting a wide range of topics including clinical decision support systems biomedical image analysis and prediction models this book is ideally designed for clinicians physicians programmers computer engineers IT specialists data analysts hospital administrators researchers academicians and graduate and post graduate students *Sustainable Farming through Machine Learning* Suneeta Satpathy,Bijay Kumar Paikaray,Ming Yang,Arun Balakrishnan,2024-11-25 This book explores the transformative potential of machine learning ML technologies in agriculture It delves into specific applications such as crop monitoring disease detection and livestock management demonstrating how artificial intelligence machine learning AI ML can optimize resource management and improve overall productivity in farming practices Sustainable Farming through Machine Learning Enhancing Productivity and Efficiency provides an in depth overview of AI and ML concepts relevant to the agricultural industry It discusses the challenges faced by the agricultural sector and how AI ML can address them The authors highlight the use of AI ML algorithms for plant disease and pest detection and examine the role of AI ML in supply chain management and demand forecasting in agriculture It includes an examination of the integration of AI ML with agricultural robotics for automation and efficiency The authors also cover applications in livestock management including feed formulation and disease detection they also explore the use of AI ML for behavior analysis and welfare assessment in livestock Finally the authors also explore the ethical and social implications of using such technologies This book can be used as a textbook for students in agricultural engineering precision farming and smart agriculture It can also be a reference book for practicing professionals in machine learning and deep learning working on sustainable agriculture applications

*Optimal Input Signals for Parameter Estimation* Ewaryst Rafajłowicz,2022-03-07 The aim of this book is to provide methods and algorithms for the optimization of input signals so as to estimate parameters in systems described by PDE s as accurate as possible under given constraints The optimality conditions have their background in the optimal experiment design theory for regression functions and in simple but useful results on the dependence of eigenvalues of partial differential operators on their parameters Examples are provided that reveal sometimes intriguing geometry of spatiotemporal input signals and responses to them An introduction to optimal experimental design for parameter estimation

of regression functions is provided The emphasis is on functions having a tensor product Kronecker structure that is compatible with eigenfunctions of many partial differential operators New optimality conditions in the time domain and computational algorithms are derived for D optimal input signals when parameters of ordinary differential equations are estimated They are used as building blocks for constructing D optimal spatio temporal inputs for systems described by linear partial differential equations of the parabolic and hyperbolic types with constant parameters Optimality conditions for spatially distributed signals are also obtained for equations of elliptic type in those cases where their eigenfunctions do not depend on unknown constant parameters These conditions and the resulting algorithms are interesting in their own right and moreover they are second building blocks for optimality of spatio temporal signals A discussion of the generalizability and possible applications of the results obtained is presented
