If Bullfrogs Had Wings:

The Math Tutor Robert Laurence, 2015-03-10 Sam Butler thinks his life should be about pastern dermatitis least common denominators and the sophomore pole vaulter from Slovenia But it isn't Sam is a retired widower who lives a quiet well ordered life looking after a small herd of off the track Thoroughbreds Ellen Quincy is a home schooled tweener whose family raises chickens on the other side of the highway Lynda Stratford is a young physics professor from the nearby university This odd and non romantic triangle forms in the fall of 2012 and the story follows the three of them for the next six months a half year in which Sam's life is turned inside out profoundly and perhaps forever changed It's a story about love and friendship about loyalty and its breach about what's lost and what's found A story about horses lasers and a young girl wondering about life death and what follows Infinity and the Proofs for the Existence of God Glenn F.

Chesnut, 2019-03-15 This book is more than just a set of logical proofs It shows us who and what God is and explains how our universe exploded into existence in the Big Bang some 13.799 billion years ago in such a way that all other Being in the universe derives its existence and nature and its capacities for growth power moral character change and novelty from God as the Ground of Being This is a book for people who are interested in philosophy It begins with a discussion of some of the fallacies into which the concept of infinity has led careless thinkers over the centuries In particular Chesnut demonstrates how often the modern defenses of atheism have been based on what are no more than pseudo infinite regresses This includes in particular self delusive attempts to get rid of God by constructing what would be no more than imaginary universe sized perpetual motion machines The last half of the book then has as its central focus the set of Five Proofs for the Existence of God formulated by the great medieval thinker St Thomas Aquinas where Chesnut begins by showing how each of the proofs was interpreted in the middle ages But the development of modern science requires that the Five Proofs be reworked for today so he shows for example how the Proof from Motion can be reworded as an Argument from Energy subject to the laws of thermodynamics and how the Proof from Gradations in Truth and Value forces us to decide whether we will accept that at least some moral values are real or instead will become what modern psychologists call psychopaths This present book combined with the work Chesnut authored nine years ago God and Spirituality Philosophical Essays sets out an architectonic philosophical system for the twenty first century grounded on one side in the classics of the ancient Greco Roman world and the medieval period but on the other hand taking seriously the revolutionary changes in western thought produced by the development of twentieth century science including relativity quantum theory the uncertainty principle and Godel's proof
