- Volume 2 - Finance & Banking Dheeraj Kumar Singh, *Legal Principles for Combatting Cyberlaundering* Daniel Adeoyé Leslie, 2014-07-18 This volume deals with the very novel issue of cyber laundering The book investigates the problem of cyber laundering legally and sets out why it is of a grave legal concern locally and internationally The book looks at the current state of laws and how they do not fully come to grips with the problem As a growing practice in these modern times and manifesting through technological innovations cyber laundering is the birth child of money laundering and cybercrime It concerns how the internet is used for washing illicit proceeds of crime In addition to exploring the meaning and ambits of the

problem with concrete real life examples more importantly a substantial part of the work innovates ways in which the dilemma can be curbed legally This volume delves into a very grey area of law daring a yet unthreaded territory and scouring undiscovered paths where money laundering cybercrime information technology and international law converge In addition to unearthing such complexity the hallmark of this book is in the innovative solutions and dynamic remedies it postulates

Reflexive Governance in EU Equality Law Emma Lantschner,2021-10-21 The Covid 19 pandemic has revealed how far we as a European society still are from the proclaimed Union of Equality The book explores how the promise of equal treatment can become a reality and compliance with the EU acquis relating to equality and non discrimination can be improved It studies enforcement and promotion aspects of the two watershed directives of 2000 the Racial Equality Directive 2000 43 EC and the Employment Equality Directive 2000 78 EC through the lens of reflexive governance This governance approach is proposed as having great potential in enhancing the likelihood of sustainability or continuation of reforms in the current candidate countries and EU Member States through its emphasis on reflexive learning processes and the cooperation between EU institutions national authorities and civil society actors In order to deploy this potential there is however a need for more consistent and transparent monitoring both with regard to candidate countries as well as old and new Member States and a reconsideration of the understanding of monitoring as such It should be seen as helping to deconstruct own preference formations and as a possibility to learn from successes and failures in a cooperative and recursive process To work on these lacunae and improve learning and monitoring processes this book identifies indicators that are deduced from the comparative review of the implementation practice of the member states This book is thus a contribution to the existing literature in the fields of Europeanization governance and the right to equality and non discrimination
