The Story of Original Loss Malcolm Owen Slavin, PhD, 2024-05-20 This book explores the universal human existential trauma of original loss a trauma the author describes as arising from our primal human evolutionary loss of experiencing ourselves as innately belonging to and instinctively at home within the larger natural world In this trauma arose our existential awareness of impermanence and mortality along with the need to mourn that loss in order to create a sense of belonging and identity The book describes how the invention of art and group ritual became the collective ways we mourn our shared existential loss It describes as well how it is the art within the psychoanalytic practice that enables both patient and analyst to grieve their individual versions of our shared original loss Drawing on the work of Winnicott Loewald and Ogden as well as art theory and religion this book offers a new perspective on the intersection of metaphorical artistic thinking and psychoanalysis This book will appeal to psychoanalysts psychotherapists and scholars of poetic visual and musical metaphor creativity evolution and history of art

Love and Loss - Volume Two Betty Hibod, 2024-11-26 Many books have been written as histories recounting events that shaped the life of a group society nation or civilization or as biographies recounting events and achievements relating to one person's life and work Many books have been written putting forth ideas philosophies and words of wisdom to live by Some of these we call holy books or scripture Fewer books have been written like this one which go behind the scenes of history lay bare the feelings behind the philosophies and document the painful and joyful inner path along which historical events and philosophical ideas emerge This book is intensely even shockingly personal not clinical or abstract or detached It is an intimate detailed sensual and sometimes disturbing account of a life lived on the cusp that bridges time and eternity Its focus is narrow it does not reveal much at all about anyone's visible public life or accomplishments but it explores in great depth the invisible contents of minds hearts and souls The scriptures and scriptural commentaries of most religions describe a path to salvation or bliss and provide instructions or guideposts for moving along the path but they are still only theoretical hypothetical mythical or metaphorical accounts This book seeks to show how the theories and hypotheses play out pragmatically in real time and space how the myths come alive in flesh and spirit how the metaphors become the very things they symbolize How does daily life look from inside someone in the throes of awakening How does she know who or what she is How is her destiny revealed How do seemingly ordinary mundane events become miracles This book begins to answer those questions
