GCE Advanced Subsidiary Level

MARK SCHEME for the May/June 2014 series

9700 BIOLOGY

9700/34

Paper 34 (Advanced Practical Skills 2),
maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

successful city planning has been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In The Art of Classic Planning architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers The Art of Classic Planning restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L'Enfant's Washington Haussmann's Paris and Burnham's Chicago Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world The Art of Classic Planning celebrates the enduring principles of urban design and invites us to return to building beautiful cities

Hormones and Economic Behavior Pablo Brañas-Garza, Levent Neyse, Martin Voracek, Ulrich Schmidt, Monica Capra, 2019-01-29 Behavioral correlates of hormones emphasized by psychologists have captured the attention of economists in the past years Behavioral economists in particular have investigated the possible roles of hormones on economic decision making and behavior as well as social preferences and cognitive abilities Testosterone oxytocin dopamine serotonin and stress hormones are the foremost studied ones in economic contexts Yet the results are mixed and the relationship between hormones and economic behavior is under investigated to this date Hormone levels are measurable and manipulatable e.g. activate/deactivate/block The fact that the behavioral economics also employs experimental methodology makes it possible to observe both correlational and causal relationships between hormones and economic behavior Since numerous environmental social and biological factors interact with hormone fluctuations capturing the true impacts of hormones on decisions and behavior is challenging Manipulating hormone levels in the body is a method that is used to tackle this issue Such studies compare observed behaviors of hormones or placebo administered participants to determine causal relationships This Research Topic welcomes the studies on the direct or indirect correlates of hormones on economic behavior and decision making to create new insights on the economic consequences of endocrine activity

Insect Olfactory Proteins (From Gene Identification to Functional Characterization) Peng He, Nicolas Durand, Shuang-Lin Dong, 2020-01-06

Political Institutions and Practical Wisdom Maxwell A. Cameron, 2018-06-19 Societies create rules that govern our practices Such rules can only be effective however if the intermediaries between rules and practices institutions harness the skill knowledge and motivation of practitioners Yet everywhere institutions seem to be failing Over reliance on rules and incentives has not only corrupted the intrinsic motivations that arise from practice it has also promoted the spread of competitive utility maximizing and thereby discouraged the kind of moral agency necessary for institutions to work well In Political Institutions and Practical Wisdom

Maxwell Cameron takes this basic insight as his starting point to argue that the rapid spread of the tenets of a neoliberal political economic philosophy in our era has contributed to the erosion of institutional capacity. The book contributes to an emerging field of social science research grounded in the Aristotelian idea of phronesis or practical wisdom. Drawing on a wide range of examples, Cameron not only shows how good institutions depend on wise practitioners, he argues that contemporary democratic institutions are being assaulted by excessive partisanship and the hollowing out of democratic deliberation by the corrupting effects of money in politics and by the use of neoliberal techniques of governance that are designed to foster competition rather than the pursuit of common goods. At once a valuable guide to designing effective institutions and a trenchant critique of contemporary institutional failure, *Political Institutions and Practical Wisdom* promises to reshape our understanding of one of the most basic building blocks of contemporary social and political life. [Narrating the Sex Trade](#) Tracie L. Wilson, 2025-09-30 Examining a range of sex trade accounts from state documents, activist groups, folk narratives, and key figures in Polish, Ukrainian, and Yiddish literature, this book applies new materialist perspectives to cultural history, coloniality, and imperialism in the study of Europe's eastern borderlands. The text centers on late nineteenth and early twentieth century contexts with eastern Galicia and Lviv as its focal point. However, these narratives flow across time and space, stretching back to the early modern period and continuing to the present across cities in the Americas, in Asia, and along the Mediterranean Sea. The book addresses the convergence of sex trade stories with older narratives, including links to early modern abduction accounts and antisemitic tropes. It also examines the involvement of prominent activists whose personal lives contributed to modern research in psychology and sexuality, such as Bertha Pappenheim, Anna O, and Karl M. Baer. Its groundbreaking approach, unsettling notions of center and periphery, is relevant to the study of a myriad of geographic contexts worldwide and to both historical analysis and present-day situations. This volume is intended for undergraduates, postgraduates, specialists, and general readers interested in east-central Europe, gender, coloniality, imperialism, migration, technology, and modernity, narrative, and literary studies, and new materialist approaches. [Capital Failure](#) Nicholas Morris, David Vines, 2014-08-07 Adam Smith's invisible hand relied on the self-interest of individuals to produce good outcomes. Economists' belief in efficient markets took this idea further by assuming that all individuals are selfish. This belief underpinned financial deregulation and the theories on incentives and performance which supported it. However, although Adam Smith argued that although individuals may be self-interested, he argued that they also have other motivations, including a desire for the approbation of others. This book argues that the trust-intensive nature of financial services makes it essential to cultivate such other motivations, and it provides proposals on how this might be done. Trustworthiness in the financial services industry was eroded by deregulation and by the changes to industry structure which followed. Incentive structures encouraged managers to disguise risky products as yielding high returns, and regulation failed to curb this risk-taking, rent-seeking behaviour. The book makes a number of proposals for reforms of

governance and of legal and regulatory arrangements to address these issues The proposals seek to harness values and norms that would reinforce other regarding behaviour so that the firms and individuals in the financial services act in a more trustworthy manner Four requirements are identified which together might secure more strongly trustworthy behaviour the definition of obligations the identification of responsibilities the creation of mechanisms which encourage trustworthiness and the holding to account of those involved in an appropriate manner Financial reforms at present lack sufficient focus on these requirements and the book proposes a range of further actions for specific parts of the financial industry
