MARK SCHEME for the May/June 2014 series

9706/21

9706 ACCOUNTING

Paper 2 (Structured Questions – Core),
maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Mark Anthony Camilleri

May June 2014 Paper 12 Accounting Mark Scheme:

Shadow Networks Francisco Louçã, Michael Ash, 2018-10-03 The 2007-08 financial crisis surprised many economists and the public. But how did the crisis come about? Why was it so deep and why has the clean up been so slow and painful? Many accounts of the crisis focus on renegade activity in marginal financial sectors. *Shadow Networks* challenges this prevailing view and sets out to demonstrate that far from a dissident branch, the shadow finance that initiated the crisis is tightly networked with and highly profitable for bank-based finance. The collapse was not an accident but baked into the system of finance from the start. *Shadow Networks* traces the complex web of power that caused crisis and gives vivid descriptions of the actors in the quarter century leading up to 2007 to explain how the now decade-long crisis took shape. *Shadow Networks: Financial Disorder and the System that Caused Crisis* is a probing examination of the roles of the powerful elite. It traces the networks and institutions that support a finance-focused market-centered model of economy and society from their ascendancy to their surprising resilience in the face of manifest failures. **ACCA Paper P6 Advanced Taxation FA2012**

Beyond Greenwash Hamish van der Ven, 2019-03-21 From green frogs and blue angels to white bunnies modern consumers are confronted by a growing array of colorful eco labels on everything from coffee to computers When eco labels are credible they can lead to dramatic change in environmental practices broadly and quickly by leveraging the purchasing power of corporate clients e g Walmart and McDonalds to influence global supply chains But the credibility of such labels is highly variable and despite the existence of established practices for eco labeling many labels remain little more than superficial exercises in greenwash How can consumers separate greenwash from genuine attempts to address environmental challenges Beyond Greenwash addresses this question by systematically investigating the credibility of transnational eco labeling organizations across countries and commercial sectors Using an innovative proxy measure for credibility that examines adherence to established best practices Hamish van der Ven proposes a novel theory of rigor and credibility in transnational eco labeling that upends conventional wisdom He argues that the

credibility of an eco label does not depend on who creates or manages it whether a government industry association professional standard setter or environmental NGO Rather it depends on which types of businesses use the label More specifically eco labeling organizations that target bigger consumer facing retailers tend to create credible eco labels out of a desire to insulate their clients from critical scrutiny and gain acceptance in new markets This theory challenges the conventional wisdom that only governments or environmental NGOs can create meaningful environmental governance and suggests that who is being governed matters as much if not more than who is doing the governing Standing up for a Sustainable World Claude Henry,Johan Rockström,Nicholas Stern,2020-12-25 The world has witnessed extraordinary economic growth poverty reduction and increased life expectancy and population since the end of WWII but it has occurred at the expense of undermining life support systems on Earth and subjecting future generations to the real risk of destabilising the planet This timely book exposes and explores this colossal environmental cost and the dangerous position the world is now in Standing up for a Sustainable World is written by and about key individuals who have not only understood the threats to our planet but also become witness to them and confronted them **Metrics** Vincanne Adams,2016-03-05 This volume s contributors evaluate the accomplishments limits and consequences of using quantitative metrics in global health Whether analyzing maternal mortality rates the relationships between political goals and metrics data or the links between health outcomes and a program s fiscal support the contributors question the ability of metrics to solve global health problems They capture a moment when global health scholars and practitioners must evaluate the potential effectiveness and pitfalls of different metrics even as they remain elusive and problematic Contributors Vincanne Adams Susan Erikson Molly Hales Pierre Minn Adeola Oni Orisan Carolyn Smith Morris Marlee Tichenor Lily Walkover Claire L Wendland National Parliaments after the Lisbon Treaty and the Euro Crisis Davor Jancic,2017-04-05 A critical assessment by eminent legal and political science experts in the field this book examines the two key factors which have deeply affected the position of national parliaments in European integration the entry into force of the Lisbon Treaty and the sovereign debt crisis in the Eurozone Structured in three parts the book will address the question Do national parliaments exhibit resilience or resignation in these changed politico legal and socio economic circumstances in the EU Part I investigates the impact of the aforementioned factors against the theoretical concepts of constitutionalism and democratic legitimacy Part II evaluates the changing nature of parliamentary functions and Part III appraises the evolving relationships between national parliaments and national governments national courts and EU institutions in addition to surveying the emerging patterns of interparliamentary cooperation This interdisciplinary collection yields novel insights into how the deepening of the Economic and Monetary Union and the pursuance of new initiatives for parliamentary action impact the shape and nature of EU democracy Recent Trends in Blockchain for Information Systems Security and Privacy Amit Kumar Tyagi,Ajith Abraham,2021-11-23 Blockchain technology is an emerging distributed decentralized architecture and

computing paradigm which has accelerated the development and application of cloud fog and edge computing artificial intelligence cyber physical systems social networking crowdsourcing and crowdsensing 5g trust management and finance and other many useful sectors Nowadays the primary blockchain technology uses are in information systems to keep information secure and private However many threats and vulnerabilities are facing blockchain in the past decade such 51% attacks double spending attacks etc The popularity and rapid development of blockchain brings many technical and regulatory challenges for research and academic communities The main goal of this book is to encourage both researchers and practitioners of Blockchain technology to share and exchange their experiences and recent studies between academia and industry The reader will be provided with the most up to date knowledge of blockchain in mainstream areas of security and privacy in the decentralized domain which is timely and essential this is due to the fact that the distributed and p2p applications are increasing day by day and the attackers adopt new mechanisms to threaten the security and privacy of the users in those environments This book provides a detailed explanation of security and privacy with respect to blockchain for information systems and will be an essential resource for students researchers and scientists studying blockchain uses in information systems and those wanting to explore the current state of play
