J. Habraken,2000-08-25 The influential Dutch architect's long awaited manifesto on the everyday environment as the first and best ground for establishing the significance and coherence of architecture According to N J Habraken intimate and unceasing interaction between people and the forms they inhabit uniquely defines built environment The Structure of the Ordinary the culmination of decades of environmental observation and design research is a recognition and analysis of everyday environment as the wellspring of urban design and formal architecture The author's central argument is that built environment is universally organized by the Orders of Form Place and Understanding These three fundamental interwoven principles correspond roughly to physical biological and social domains Historically ordinary environment was the background against which architects built the extraordinary Drawing upon extensive examples from archaeological and contemporary sites worldwide the author illustrates profound recent shifts in the structure of everyday environment One effect of these transformations Habraken argues has been the loss of implicit common understanding that previously enabled architects to formally enhance and innovate while still maintaining environmental coherence Consequently architects must now undertake a study of the ordinary as the fertile common ground in which form and place making are rooted In focusing on built environment as an autonomous entity distinct from the societies and natural environments that jointly create it this book lays the foundation for a new dialogue on methodology and pedagogy in support of a more informed approach to professional intervention *Introduction to Japanese Architecture* Michiko Kimura Young,David Young,2012-10-30 Introduction to Japanese Architecture provides an overview of Japanese architecture in its historical and cultural context It begins with a discussion of prehistoric dwellings and concludes with a description of contemporary trends in areas as diverse as country inns underground malls and love hotels The intervening 12 000 years are analyzed in reference to major changes in architecture caused by Buddhist and indigenous influences feudalism and finally the influence of Western culture in the 19th century The architecture book provides insights into the dynamic nature of this contrast and how it reflects the underlying diversity of Japanese culture The comprehensive accessible text is complemented by over 340 color photographs diagrams and specially commissioned watercolors
