Behavioral Principles in Communicative Disorders Christine A. Maul, Brooke R. Findley, Amanda Nicolson Adam, 2015-12-17 Behavioral Principles in Communicative Disorders Applications to Assessment and Treatment examines the basic principles of the science of behaviorism and applies those principles to the assessment and treatment of communicative disorders It begins with the history and basic principles of behaviorism as well as a chapter examining Skinner s 1957 concept of verbal behavior and

functional units of verbal behavior The text then discusses functional behavior assessment the formulation of operationally defined target behaviors discrete trial treatment procedures and various techniques for increasing desirable behaviors and decreasing undesirable behaviors The concluding chapters describe single case research designs that support the efficacy of behavioral principles and address ethical questions and historic controversies surrounding the application of those principles Speech language pathologists SLPs seek to change communicative behaviors in the clients they serve the principles of behavioral science have many applications to the assessment and treatment of communicative disorders There is a vast body of evidence indicating the efficacy of behavioral approaches in behavior modification and SLPs have been tasked by their professional associations to employ evidence based practices Also there is an appreciation for the usefulness of behavioral principles in treating clients with very severe communicative disorders such as autism apraxia and dysfluency This is evidenced by the development of the field of applied behavior analysis and the growing numbers of board certified behavior analysts BCBA with whom SLPs may be called upon to collaborate Behavioral Principles in Communicative Disorders is primarily designed for practicing speech language pathologists looking for detailed descriptions of evidence based treatment procedures as well as professors and students in university programs in communicative disorders However professionals in other fields such as applied behavior analysis and special education will also find this to be a highly useful text The Normal Accident Theory of Education Andrew K. Milton, 2014-04-01 Much of the current debate about education too often resembles the blind men describing an elephant apprehending only a particular part of the situation or the process many analysts tell an evocative but incomplete story The so called reform discussion proceeds with a lack of depth about the nuances and realistic limitations in the institutional order of school This book argues that as regulation of schools moves further up the bureaucratic hierarchy first to state departments of education then to the national department of education the legal and institutional requirements get more intensive but less concretely useful in class rooms This bureaucratization serves to tighten the organizational environment thereby increasing the risk of normal accidents The increasing governmental management in other words makes it more likely that schools will fail to meet their goals Analyses of education are too often developed for public consumption in a fast moving political world This book examines some of the deeper organizational reasons why things don't work so well in school as well as a look at some of things that do work Most importantly the book will explain how the social and cultural expectations of what schools can do may create unrealistic hopes We as a society and schools as institutions embrace these unreasonably high hopes at our collective peril Check out Andrew's latest interview with Seattle Radio <http://kiroradio.com> listen 9972862 **Strategies for Developing Higher-Order Thinking Skills, Grade K-2** Wendy Conklin, 2012-05-18 Developed for grades K-2 this resource provides teachers with strategies to build every student's mastery of high level thinking skills promote active learning and encourage students to analyze evaluate and create Model lessons are provided as they integrate strategy methods including questioning

decision making creative thinking problem solving and idea generating
