Research, Quality, Competitiveness Attilio Stajano, 2008-09-22 The European Union EU was launched as a response to the economic dominance of the United States and to a lesser degree the Soviet Union The nations of Western Europe were too small to compete against large scale and diversified economies on their own Six countries eventually expanding to 27 and counting took a series of steps toward progressively deeper integration the removal of internal tariffs the construction of a common external tariff the elimination of many but not all non tariff barriers leading to a single market and the adoption of a common currency by 15 of the member states The EU today equals and even exceeds the U S on many key indicators of performance In the process two similar but nonetheless divergent models of social and economic life stand in contrast with each other The U S is more committed to capitalism and does little to dilute its harsh edges while the nations of Europe support wider social safety nets and more active regulation of commercial activity to mute the crueler

aspects of the free market Until recently the economic dynamism of the U S called into question whether the so called European social model was sustainable in an era of globalization The EU was slipping in competitiveness and was being challenged by new global powerhouses like China and India Although the U S economy has slowed there is little indication that European countries are capable of leveraging the situation to their advantage **Doing Good Great** Willie Cheng, Sharifah Mohamed, Cheryl Tang, 2015 From migrant workers and media freedom to housing slums this book captures the gamut of social issues that plague Asia telling the stories behind thirteen committed individuals who have effected great change in their respective causes These stories are about the behemoths such as Dharma Master Cheng Yen from Taiwan and Sir Fazle Hasan Abed from Bangladesh who lead some of the world's largest nongovernmental organisations to Aki Ra from Cambodia and Sompop Jakantra from Thailand whose smaller teams have saved hundreds of lives from landmines and prostitution respectively The social heroes portrayed have pursued seemingly quotidian causes that citizens of developed countries may take for granted such as toilets in India decent housing for the poor in Hong Kong and mainly making life better for those whom society appears to have forgotten Reader Reviews The people working to address social issues are not always as well documented as the issues themselves it is important to bring an awareness of them into the mainstream media It's easy to become overwhelmed by societal injustice but these stories show that even when you can't count on your government to protect your rights individuals working in social justice can make positive change Camille Neale AWARE This book is an excellent snapshot of 12 Asian countries and their circumstances and challenges Cheong Suk Wai The Straits Times

Assured Destruction David Bath, 2020-03-15 Assured Destruction Building the Ballistic Missile Culture of the U S Air Force documents the rapid development of nuclear ballistic missiles in the United States and their equally swift demise after the Cuban Missile Crisis revealing how these drastic changes negatively influenced both the Air Force and the missile community David W Bath contends that the struggle to create and control nuclear ballistic missiles threatened both the dominance of the United States during an intensifying Cold War and the strategic airpower mission of the newly created Air Force The book details the strenuous efforts required to create and prepare a missile arsenal before the Cuban Missile Crisis which occurred only five years after the first missile was declared operational It uses the personal recollections of former missileers and the professional military education theses they wrote to highlight some of the concerns that have faced the missileers who operated and worked on these powerful weapons from 1957 to the present The highlight of the book however is the personal stories of the missileers who served during the missile crisis revealing the efforts that they went to in order to prepare these unique and untried weapons for what many thought might become the third world war
