Algebraic $\overline{\mathbb{Q}}$ -Groups as Abstract Groups Olivier Frécon, 2018-10-03 The author analyzes

the abstract structure of algebraic groups over an algebraically closed field F of characteristic zero and a given connected affine algebraic Q group the main theorem describes all the affine algebraic Q groups such that the groups are isomorphic as abstract groups. In the same time it is shown that for any two connected algebraic Q groups and the elementary equivalence of the pure groups implies that they are abstractly isomorphic. In the final section the author applies his results to characterize the connected algebraic groups all of whose abstract automorphisms are standard when Q is of positive characteristic. In characteristic zero a fairly general criterion is exhibited.
