Emergency Research Ethics A.M. Viens,2017-03-02 The essays selected for this volume focus on issues that arise when attempting to design review and undertake research involving human participants who are experiencing a private or public emergency The main themes discussed by the essays are the distinctive and significant ethical questions as to how research participants can be treated during emergency settings the ethical challenges raised by emergencies for researchers undertaking research and its effects on the nature of research pursued and procedural obstacles raised by emergencies which can affect the quality of good research ethics review The volume is unique in that it is the first collection to exclusively deal with all of the central ethical aspects of conducting human subject research in the context of emergency *The Square*

Kilometre Array: An Engineering Perspective Peter J. Hall,2006-01-19 The Square Kilometre Array SKA Project is a global project to design and construct a revolutionary new radio telescope with of order 1 million square meters of collecting area in the wavelength range from3mto1cm It will have two orders of magnitude greater sensitivity than current telescopes and an unprecedented large instantaneous field of view These capabilities will ensure the SKA will play a leading role in solving the major astrophysical and cosmological questions of the day see the science case at www.skatelescope.org/pages/page_astronomy.htm The SKA will complement major ground and space based astronomical facilities under construction or planned in other parts of the electromagnetic spectrum e.g ALMA JWST ELT XEUS The current schedule for the SKA foresees a decision on the SKA site in 2006 a decision on the design concept in 2009 construction of the first phase international path under from 2010 to 2013 and construction of the full array from 2014 to 2020 The cost is estimated to be about 1000 M

The SKA Project currently involves 45 institutes in 17 countries many of which are involved in nationally or regionally funded state of the art technical developments being pursued ahead of the 2009 selection of design concept This Special Issue of Experimental Astronomy provides a snapshot of SKA engineering activity around the world and is based on presentations made at the SKA meeting in Penticton BC Canada in July 2004 Topics covered include antenna concepts software signal transport and processing radio frequency interference mitigation and reports on related technologies in other radio telescopes now under construction Further information on the project can be found at www.skatelescope.org **Verified Software:**

Theories, Tools, Experiments Bertrand Meyer, James Woodcock,2008-07-07 A Step Towards Verified Software Worries about the reliability of software are as old as software itself techniques for allaying these worries predate even James King's 1969 thesis on A program verifier What gives the whole topic a new urgency is the conjunction of three phenomena the blitz like spread of software rich systems to control ever more facets of our world and our lives our growing impatience with deficiencies and the development proceeding more slowly alas than the other two trends of techniques to ensure and verify

software quality In 2002 Tony Hoare one of the most distinguished contributors to these advances over the past four decades came to the conclusion that piecemeal efforts are no longer sufficient and proposed a Grand Challenge intended to achieve over 15 years the production of a verifying compiler a tool that while processing programs would also guarantee their adherence to specified properties of correctness robustness safety security and other desirable properties As Hoare sees it this endeavor is not a mere research project as might normally be carried out by one team or a small consortium of teams but a momentous endeavor comparable in its scope to the successful mission to send a man to the moon or to the sequencing of the human genome

Ethics of Spying Jan Goldman, 2009-12-14 *Ethics of Spying A Reader for the Intelligence Professional Volume 2* picks up where the first book ended but with a twist The book begins with an historical perspective of the expectations of moral and ethical conduct of personnel working in intelligence In a previously classified memo from 1941 and a report from 1954 the reader gets a sense of both the history and perception of what was expected of professional conduct as viewed from government officials The first half of this book seeks to define an intelligence professional while the second half of the book seeks to utilize various theoretical and practical perspectives The richness of this publication is aided by the international views of its authors which hail from Israel the United Kingdom Switzerland and the United States among others These prominent scholars explore ethics through the intelligence cycle and how ethics is evolving and viewed in a post 9 11 world The book concludes with a survey on ethical conduct by interrogators a brief history of intelligence reform and a bibliography on this subject The history and international perspectives provided in this book lay the foundation for further study in this increasingly prominent field of interdisciplinary study

Alignment of Department of Defense Manpower, Resources, and Personnel Systems Harry Thie, 2007 Documentation of an analysis to determine whether the Department of Defense manpower resources and personnel systems are aligned to meet military readiness and operational requirements effectively and efficiently

Practical Astrodynamics Alessandro de Iaco Veris, 2017-11-28 This modern textbook guides the reader through the theory and practice of the motion and attitude control of space vehicles It first presents the fundamental principles of spaceflight mechanics and then addresses more complex concepts and applications of perturbation theory orbit determination and refinement space propulsion orbital maneuvers interplanetary trajectories gyroscope dynamics attitude control and rocket performance Many algorithms used in the modern practice of trajectory computation are also provided The numerical treatment of the equations of motion the related methods and the tables needed to use them receive particular emphasis A large collection of bibliographical references including books articles and items from the gray literature is provided at the end of each chapter and attention is drawn to many internet resources available to the reader The book will be of particular value to undergraduate and graduate students in aerospace engineering

The Science of Armour Materials Ian Crouch, 2016-09-21 *The Science of Armour Materials* comprehensively covers the range of armor materials from steels and light alloys through glasses and ceramics to fibers textiles and protective apparel The book also

discusses aspects of analytical and numerical modeling as well as laboratory based high strain rate testing and ballistic testing methodologies Each chapter is written from an international perspective including reviews of the current global literature and incorporates case studies that focus upon real life applications research outcomes and lessons learned The threat spectrum is restricted to small arms ammunition high velocity fragments and stab and spike attacks as well as blast loadings Features input from an editor who is an expert in his field Dr Ian Crouch the author of over 80 publications in his field with three patents to his name Provides systematic and comprehensive coverage of armor materials modeling and testing Offers a cross disciplinary approach that brings together expertise in materials science and defense engineering Discusses aspects of analytical and numerical modeling as well as laboratory based high strain rate testing and ballistic testing methodologies

Rocket Ranch Jonathan H. Ward, 2015-06-26 Jonathan Ward takes the reader deep into the facilities at Kennedy Space Center to describe NASA's first computer systems used for spacecraft and rocket checkout and explain how tests and launches proceeded Descriptions of early operations include a harrowing account of the heroic efforts of pad workers during the Apollo 1 fire A companion to the author's book *Countdown to a Moon Launch Preparing Apollo for Its Historic Journey* this explores every facet of the facilities that served as the base for the Apollo Saturn missions Hundreds of illustrations complement the firsthand accounts of more than 70 Apollo program managers and engineers The era of the Apollo Saturn missions was perhaps the most exciting period in American space exploration history Cape Canaveral and Kennedy Space Center were buzzing with activity Thousands of workers came to town to build the facilities and launch the missions needed to put an American on the Moon before the end of the decade Work at KSC involved much more than just launching rockets It was a place like none other on Earth Technicians performed intricate operations and hazards abounded everywhere including lightning fire highly toxic fuels snakes heat explosives LOX spills and even plutonium The reward for months of 7 day workweeks under intense pressure was witnessing a Saturn V at liftoff For anyone who ever wished they had worked at Kennedy Space Center during the Apollo era this book is the next best thing The only thing missing is the smell of rocket fuel in the morning
