it all together The New Chinese Documentary Film Movement Chris Berry, Lu Xinyu, Lisa Rofel, 2010-06-01 The New Chinese Documentary Film Movement is a groundbreaking project unveiling recent documentary film work that has transformed visual culture in China and brought new immediacy along with a broader base of participation to Chinese media. As a foundational text, this volume provides a much needed introduction to the topic of Chinese documentary film, the signature mode of contemporary Chinese visual culture. These essays examine how documentary filmmakers have opened up a unique new space of social commentary and critique in an era of rapid social changes amid globalization and marketization. The essays cover topics ranging from cruelty in documentary to the representation of Beijing gay, lesbian, and queer documentary sound in documentary, the exhibition context in China, authorial intervention and subjectivity, and the distinctive on-the-spot aesthetics of contemporary Chinese documentary. This volume will be critical reading for scholars in disciplines ranging from film and media studies to Chinese studies and Asian studies CCTV for Security Professionals Alan Matchett, 2003 CCTV for Security Professionals provides the information necessary to design the ideal CCTV system. The chapters are stand-alone sources of information on their subjects and are presented in logical sequence to guide the reader from basic principles to more complex for a complete system understanding. In his straight-forward and informative text, Alan Matchett approaches the camera systems from the user's point of view, providing the security manager with the knowledge to discuss the system, its desired features, and the areas of design concern within the context of an organization's business model. This can prove to be invaluable when evaluating an existing system, the use and components of a given system, or in evaluating a system design proposed by a vendor. Installers and service personnel will benefit from the functions and possibilities that are available with the various components, and by gaining an understanding of their customers' needs. Newer technicians will learn how to set up the system properly and can familiarize themselves with the technologies that go into a CCTV system. Security equipment sales personnel will also gain a better knowledge of the customer's needs as well as learn to determine exactly what questions they should be asking the customer and what the customer's responses mean. In this manner, the book will offer invaluable tips to ensure customers get exactly what they expect in a system. Provides a detailed explanation of CCTV components and the technology behind analog and digital CCTV systems. Establishes a common language for security professionals, CCTV system designers, and sales personnel to use as a basis for system design. Provides a clear explanation of the design process and design principles **Digital Buying Guide**, 2004 **Digital Buying Guide 2004** Consumer Reports, Consumer Reports Books Editors, 2003-09-16 Moore's Law states that computer speed will double every eighteen months, and so far it's true. Computer speeds have been accelerating relentlessly and show little signs of slowing. That's good news as computers can be used for everything from letter writing to managing personal finances and can be the entre to the Internet giving access to e-mail and hundreds of millions of sites. But your computer can also be the linchpin for scores of other digital equipment: cameras, camcorders, scanners, printers, game boxes, and more. It is also the
