- Industry's only end-to-end quality of service (QoS) solution from virtual machines through CLARiION storage
- Ease of use for dynamic virtualized infrastructures: Reconfigure back tier provision storage in one minute
- Offer performance characteristics and expand capacity of your virtual machine file systems without downtime with virtualization and metal-free technology, snapshots
- As a virtual end-to-end deployment with EMC-based reference architectures, v-Labs, and service offerings

#### EMC CLARiION CX<sub>3</sub> series provides the highest availability for virtualized IT environments

EMC designed an entirely new midrange architecture—UltraScale™—to deliver the highest levels of availability in affordable, scalable, and easy-to-use systems that meet the needs for dynamic “software” environments/deployments. The EMC® CLARiION® CX<sub>3</sub> UltraScale architecture incorporates EMC UltraPoint™ technology for back-end functionality to provide better isolation of error conditions while reducing the long latency of the FC protocol, thereby increasing the performance of the system. In addition, the EMC CLARiION CX<sub>3</sub> series is designed with redundant power/cooling capabilities and features improved fault detection, isolation, and error-correction functions. The CLARiION CX<sub>3</sub> series also features hot sparring to proactively copy data to a spare disk when the system senses a drive is beginning to fail. This reduces drive rebuild times and increases the availability of the array. EMC designed the industry's first 99.999 percent available midrange storage array because the availability of your virtual machines is only as good as the storage their data ultimately resides on. This is one of the many reasons why more customers choose EMC CLARiION for VMware than any other networked storage array.
