The Economic Development of the United Arab Emirates Ragaei al Mallakh,2014-10-30 Since the early 1970s the

oil producing countries of the Gulf have become a focus of intense interest worldwide. Most of this interest has centred on the oil giants Saudi Arabia, Iran, even Iraq and Kuwait. Yet the United Arab Emirates is also among the largest producers on a par with Kuwait, Nigeria and Libya with reserves greater than the USA. Given its high economic growth rate, the UAE is an excellent laboratory in which to test and evaluate policies and programmes to effect rapid economic development. The international stature of the UAE far exceeds what its physical size, population and breadth of resources would seem to indicate. As a member of OPEC, the UAE has played a vital role within that body's price moderates. With one of the world's highest per capita incomes and with ambitious development efforts under way, the UAE not surprisingly has become a major market for capital and consumer goods involving substantial foreign services, banking, business and industry. Based on more than a decade of study on site research and interviews with key figures, this book which mixes the practical with the academic approach will prove of great value to Middle Eastern and development specialists, students and to the international business and financial communities. First published in 1981. *Manual for Training Needs Assessment in Human Settlements Organization* David W. Tees, Nicholas You, Fred Fisher, 1987. **Advances in Medical Education** A.J.J.A. Scherpbier, Cees P.M. van der Vleuten, J.J. Rethans, A.F.W. van der Steeg, 2012-12-06. About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht. We received 525 abstracts for the conference divided in thematic poster sessions and platform presentations. Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences. During and after the conference about 250 papers were submitted for publication in the conference proceedings leaving us little time for a post conference depression. Despite the large number of papers the editors have attempted to review and edit the papers as carefully as possible. Occasionally however correspondence exceeded reasonable deadlines preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to occasionally tedious editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flippo Berger whose expertise with desk top publishing and perseverance was a great help.
