The Costs of Conversation Oriana Skylar Mastro Consulting LLC, 2019-03-15 After a war breaks out what factors influence the warring parties decisions about whether to talk to their enemy and when may their position on wartime diplomacy change How do we get from only fighting to also talking In *The Costs of Conversation* Oriana Skylar Mastro argues that states are primarily concerned with the strategic costs of conversation and these costs need to be low before combatants are willing to engage in direct talks with their enemy Specifically Mastro writes leaders look to two factors when determining the probable strategic costs of demonstrating a willingness to talk the likelihood the enemy will interpret openness to diplomacy as a sign of weakness and how the enemy may change its strategy in response to such an interpretation Only if a state thinks it has demonstrated adequate strength and resiliency to avoid the inference of weakness and believes that its enemy has limited capacity to escalate or intensify the war will it be open to talking with the enemy Through four primary case studies North Vietnamese diplomatic decisions during the Vietnam War those of China in the Korean War and Sino Indian War and Indian diplomatic decision making in the latter conflict *The Costs of Conversation* demonstrates that the costly conversations thesis best explains the timing and nature of countries approach to wartime talks and therefore when peace talks begin As a result Mastro s findings have significant theoretical and practical implications for war duration and termination as well as for military strategy diplomacy and mediation

Travellers, Merchants and Settlers in the Eastern Mediterranean, 11th-14th Centuries David Jacoby, 2023-05-31 This collection of studies the eighth by David Jacoby covers a period witnessing intensive geographic mobility across the Mediterranean illustrated by a growing number of

Westerners engaging in pilgrimage crusade trading and shipping or else driven by sheer curiosity This movement also generated western settlement in the eastern Mediterranean region A complex encounter of Westerners with eastern Christians and the Muslim world occurred in crusader Acre the focus of two papers a major emporium it was also the scene of fierce rivalry between the Italian maritime powers The fall of the crusader states in 1291 put an end to western mobility in the Levant and required a restructuring of trade in the region The next five studies show how economic incentives promoted western settlement in the Byzantine provinces conquered by western forces during the Fourth Crusade and soon after Venice fulfilled a major function in Latin Constantinople from 1204 to 1261 The city's progressive economic recovery in that period paved the way for its role as transit station furthering western trade and colonization in the Black Sea region Venice had also a major impact on demographic and economic developments in Euboea located along the maritime route connecting Italy to Constantinople On the other hand military factors drove an army of western mercenaries to establish in central Greece a Catalan state which survived from 1311 to the 1380s

Capacity Mechanisms in the EU Energy Market Leigh Hancher,Adrien de Hauteclercque,Malgorzata Sadowska,2015-09-24 Ensuring an adequate long term energy supply is a paramount concern in Europe EU member states now intervene by encouraging investment in generation capacity offering an additional revenue stream for conventional power plants in addition to the existing heavily subsidised investments in renewable energy sources These capacity remuneration mechanisms or simply capacity mechanisms have become a hot topic in the wider European regulatory debate European electricity markets are increasingly interconnected so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighbouring electricity markets If these mechanisms are adopted by several member states with no supra national coordination and no consideration for their cross border impact they may cause serious market distortions and put the future of the European internal electricity market at risk This book provides readers with an in depth analysis of capacity mechanisms written by an expert team of policy makers economists and legal professionals It will be a first point of reference for regulators and policy makers responsible for designing optimal capacity mechanisms in Europe and will be an invaluable resource for academics and practitioners in the fields of energy regulation and competition
