

Unit 1: All About Angles

1. Use the "line" tool to draw an angle in the space below. Label the vertex B . Add a point on each of the two rays that make up your angle.

a. How would you name this angle?

$\angle B$, $\angle ABC$, $\angle CBA$

b. Is your angle acute, right, or obtuse?

2. Your angle may be small, but angles can be combined to create bigger angles. Go to [desmos.com/geometry](https://www.desmos.com/geometry) and draw 2 or more angles. Line them up as shown below. Your goal is to see if you can combine angles to get the target angle of 100° . Use the "angle" tool to measure each individual angle as you draw them. Be sure they line up (see below). Can you make the perfect 100° angle? Take a screenshot of your final work and insert below.

Example of 2 lined up angles:

Insert screenshot here:

Example of 3 lined up angles:

Your angles may look a little different. But the total should still be 100° for both.

Geometry Concepts Related Angles Page 11 3 Answer Key
