1. According to Jared Diamond, what is the one factor that allowed Europeans to develop the forces necessary to conquer vast portions of the world?

Answer: Geography-having the most productive crops and animals allowed Europeans to develop guns, germs, and steel, and ultimately, to conquer the world.

2. Why were the Europeans who settled the South African cape so successful? Describe two reasons.

Answer: The temperature and the climate in the South African cape is nearly the same as what the Europeans had at home. Because the Cape and Europe have a similar latitude (distance from the equator), they can grow the same types of crops and raise the same types of livestock in Africa as they did back home in Europe.

3. How did disease allow the Europeans to conquer the native populations in the Americas and in the African cape?

Answer: Europeans introduced germs that these populations had never before been exposed to, particularly smallpox. Because Europeans had been exposed to the disease over the course of centuries, their bodies had built up a natural resistance (antibodies) to these diseases. When the people of the Americas and the South African cape came into contact with these germs, they were killed in massive numbers, making settlement of these lands much easier for the Europeans.

4. While the Europeans who were attempting to overtake/settle the tropical areas of the African continent were responsible for introducing killer germs to the native populations, they also suffered from the effects of the germs native to this part of the world. Describe how these germs worked against the European settlers.

Answer: The Europeans were experiencing a reversal of the pattern they were used to. Rather than introducing germs to the people they hoped to conquer, they were being infected by the germs that were indigenous to Africa and losing their livestock and their own lives as a result.

Gordon,2021-02-08 An assessment of critical battles on the southern front that led to American independence An estimated one third of all combat actions in the American Revolution took place in South Carolina From the partisan clashes of the backcountry s war for the hearts and minds of settlers to bloody encounters with Native Americans on the frontier more battles were fought in South Carolina than any other of the original thirteen states The state also had more than its share of pitched battles between Continental troops and British regulars In South Carolina and the American Revolution A Battlefield History John W Gordon illustrates how these encounters fought between 1775 and 1783 were critical to winning the struggle that secured Americas independence from Great Britain According to Gordon when the war reached

stalemate in other zones and the South became its final theater South Carolina was the decisive battleground Recounting the clashes in the state Gordon identifies three sources of attack the powerful British fleet and seaborne forces of the British regulars the Cherokees in the west and internally a loyalist population numerous enough to support British efforts towards reconquest From the successful defense of Fort Sullivan the palmetto log fort at the mouth of Charleston harbor capture and occupation of Charleston in 1780 to later battles at King s Mountain and Cowpens this chronicle reveals how troops in South Carolina frustrated a campaign for restoration of royal authority and set British troops on the road to ultimate defeat at Yorktown Despite their successes in 1780 and 1781 the British found themselves with a difficult military problem having to wage a conventional war against American regular forces while also mounting a counterinsurgency against the partisan bands of Francis Marion Andrew Pickens and Thomas Sumter In this comprehensive assessment of one southern state s battlegrounds Gordon examines how military policy in its strategic operational and tactical dimensions set the stage for American success in the Revolution
