**Hadoop Real World Solutions Cookbook** Jonathan R. Owens, 2013 Realistic simple code examples to solve problems at  
scale with Hadoop and related technologies **Hadoop Real-World Solutions Cookbook** Tanmay Deshpande, 2016 Call  
Data Record Analytics using Hive **Hadoop Real-World Solutions Cookbook** Mulhim Morcos, 2014-11-03 Big data is a  
relative term describing a situation where the volume velocity and variety of data exceed an organization's storage or  
compute capacity for accurate and timely decision making Big data is not a single technology but a combination of old and  
new technologies that helps companies gain actionable insight Therefore big data is the capability to manage a huge volume  
of disparate data at the right speed and within the right time frame to allow real time analysis and reaction As we note  
earlier in this chapter big data is typically broken down by three characteristics Volume How much data Velocity How fast  
that data is processed Variety The various types of data Although it's convenient to simplify big data into the three Vs it can  
be misleading and overly simplistic For example you may be managing a relatively small amount of very disparate complex

data or you may be processing a huge volume of very simple data That simple data may be all structured or all unstructured Even more important is the fourth V veracity How accurate is that data in predicting business value Do the results of a big data analysis actually make sense Determining relevant data is key to delivering value from massive amounts of data However big data is defined less by volume which is a constantly moving target than by its ever increasing variety velocity variability and complexity

**Hadoop MapReduce Cookbook** Srinath Perera,2013 Individual self contained code recipes Solve specific problems using individual recipes or work through the book to develop your capabilities If you are a big data enthusiast and striving to use Hadoop to solve your problems this book is for you Aimed at Java programmers with some knowledge of Hadoop MapReduce this is also a comprehensive reference for developers and system admins who want to get up to speed using Hadoop
