important new book from one of today's greatest business thinkers **Lead Right for Your Company's Type** William Schneider, 2017-07-20 Lead Right for Your Company's Type will help you find the best strategies for success for your unique business. Every year businesses needlessly fail because they adapted the wrong strategies suited for their organization's strengths. A mid-tier retail chain is derailed by leadership demands for superior products instead of reliably low prices. A software giant is brought to its knees by prioritizing profits over innovation. A small arts college is destabilized by top-down rules designed for a predictable and dependable company. There is no one-size-fits-all game plan for success when it comes to the wide array of businesses today. Success starts with knowing the kind of business you're really in. In Lead Right for Your Company's Type, learn the four categories that every enterprise falls into depending on their customer promise: customized e.g. ad agency, predictable and dependable e.g. utility company, benevolent e.g. educational institution, and best-in-class e.g. high-tech company like Apple. Then follow a proven five-step process to help you in diagnosing your organization's ills and stop them at their source. Apply the wrong practices and the mismatch pulls the enterprise apart. However, when leadership practices fit the customer promise and company type, the organization thrives.

Storied Health and Illness Jill Yamasaki, Patricia Geist-Martin, Barbara F. Sharf, 2016-07-01 Health and illness are storied experiences that necessarily entail personal, cultural, and political complexities. For all of us, communicating about health and illness requires a continuous negotiation of these complexities and a delicate balance between what we learn about the biology of disease from providers and our own very personal, subjective experiences of being ill. Storied Health and Illness brings together dozens of noteworthy scholars, both established and emerging, in a provocative collection that embraces narrative ways of knowing, to think about, analyze, and reconsider our own and others' health beliefs, behaviors, and communication. Comprehensive content reflects the editors' substantial research in integrative health, narrative care, and innovative ways of improving well-being and quality of life in personal relationships, healthcare, the workplace, and community settings. Unique narrative approaches to the study of health communication include 14 chapters written by 22 contributors who use engaging stories from their own research or personal experience to introduce and ground foundational communication concepts in healthcare, health promotion, community support, organizational wellness, and other health-related sites of interest. Compelling stories of individuals living with the inherent challenges and unexpected opportunities of mental illness, addiction, aging, cancer, dialysis, sexual harassment, miscarriage, obesity, alopecia, breastfeeding, health threats to immigrant workers, developmental differences, and youth gun violence. 36 Health Communication in Action (HCIA) sidebars that highlight applied research of innovative health communication scholars in their own words, and then prompt readers to think more deeply about their own perspectives and experiences. Theorizing Practice boxes that encourage readers to reflect on stories that describe significant experiences in their own and others' lives as they consider assumptions and enlarge their viewpoints in previously unimagined ways.
