(325) 2014 ,2017-05-20 The Russian Federation in Global Knowledge Warfare Holger Mölder,Vladimir Sazonov,Archil Chochia,Tanel Kerikmäe,2021-07-24 This book examines Russian influence operations globally in Europe and in Russia's

neighboring countries and provides a comprehensive overview of the latest technologies and forms of strategic communication employed in hybrid warfare. Given the growing importance of comprehensive information warfare as a new and rapidly advancing type of international conflict in which knowledge is a primary target, the book examines Russia's role in Global Knowledge Warfare. The content is divided into three parts: the first of which addresses conceptual issues such as the logic of information warfare, the role of synthetic media, and Russia's foreign policy concepts including the impact of the COVID-19 pandemic on influence operations. The second part analyzes technological, legal, and strategic challenges in modern hybrid warfare, while the third focuses on textual, cultural, and historical patterns in information warfare, also from various regional e.g. the Western Balkans, Romania, Ukraine, and the Baltic perspectives. The book is primarily intended for scholars in the fields of international relations, security, and the military sciences who are interested in Russian foreign policy and influence operations, but also their impact on the global security environment. **Spacewear** Barbara Brownie, 2019-01-10

Today we are living in the New Space Age where mass commercial space travel is almost within our grasp. This otherworldly possibility has opened up new cultural images of space, both real and fictional, and has caused fashion design and spacesuit engineering to intersect in new exciting ways. **Spacewear** traverses this uncharted territory by exploring the changing imagination of space in fashion and fashion in space from the first Space Age to the 21st century. Exploring how space travel has stylistically and technologically framed fashion design on earth and how we need to revisit established design practices for the weightless environment, **Spacewear** connects the catwalk and the space station. This book draws together speculative fantasies in sci-fi films such as *Star Trek* and *2001: A Space Odyssey* with the engineered spacesuits *Biosuit* and the *NASA Z-2* and with catwalk interpretations by the likes of Alexander McQueen, Hussein Chalayan, Andr  Courr ges, and Iris van Herpen. While the development of commercial space agencies has led to new concerns for style in garments for outer space that rethink fundamental design principles such as drape, high fashion has experimented with new possibilities for weightlessness that extend far beyond the 1960s vision of Space Age metallic fabrics and helmet-style headwear. Brownie takes the reader on a fascinating journey from fantasy to function and to form, deepening our understanding of this new category of fashion that is prompting new approaches to garment design and construction both on earth and in outer space. **Between Power and Irrelevance** George E. Mitchell, Hans Peter Schmitz, Tosca Bruno-van Vijfeijken, 2020-05-28 **Between Power and Irrelevance** explores why the gap between transnational NGOs' rhetoric and reality exists and what TNGOs can do to close it. The book argues that TNGOs need to change the fundamental conditions under which they operate by bringing their own forms and norms into better alignment with their ambitions and strategies.
