Turkish-Qatari Relations Özgür Pala,Khalid Al-Jaber,2022-04-04 This book examines domestic and regional geopolitical dynamics behind Turkish Qatari relations from the past to the present Utilizing arguments of practical geopolitical reasoning zg r Pala and Khaled Al Jaber situate their analysis of evolving relations in the contexts of Ottoman British geopolitical rivalry in the Persian Gulf the Turkish Republic s fluctuating relations with the Middle East until the 2000s the AKP governments opening to the region and finally the Arab Spring and its aftermath Contextualizing the trajectory of Turkish Qatari relations within the larger Middle East and the Gulf Arab region the authors argue that material interests and identity politics have generally determined relations until the turn of the millennium Under Erdogan and Sheikh Hamad s assertive leadership and ambitious foreign policy Turkey and Qatar came to witness various foreign policy convergences on critically important regional issues Pala and Al Jaber argue that these convergences coupled with their geopolitical and security goals facilitated a political alignment between Ankara and Doha throughout the Arab Spring They argue that despite facing major geopolitical setbacks Turkey and Qatar were able to chart a much deeper cooperation which later evolved into a strategic partnership in various areas

Media Ownership and Control Suzanne Rab,Alison Sprague,2014-12-01 Competition and diversity in media and communications are fundamental to a healthy economy and democracy In India and internationally there is no consensus on the exact manner and scope of interventions that are appropriate to protect competition and pluralism in media markets Many emerging economies including India are seeking to adopt their own regulation in this area taking their lead from the UK The issues have been brought into sharp focus in India in recent years First the enactment and implementation of modern but sector neutral competition law under the Competition Act 2002 has caused a step change in regulation towards an economics and effects based approach Second in 2013 the India telecoms regulator launched controversial reform proposals to apply a media specific approach to ownership regulation As academics lawyers businesses regulators and policy makers in India cast a glance at the international experience this book examines the legal economic and policy issues relating to regulation of ownership and control of media markets The focus of comparative assessment is on examples from the European Union EU Member States and the US

Regional Community Building in East Asia Lee Lai To,Zarina Othman,2016-09-01 This volume is a collection of papers written by nationals or former nationals of the respective country in ASEAN and Northeast Asia Unlike other works written by scholars outside ASEAN or East Asia it offers an insider s point of view of the 10 ASEAN states China Japan and South Korea on regional

community building While a nationalist perspective may permeate throughout the study it is also clear that pursuing regional cooperation is considered to be important by the respective author denoting the non exclusivity between nationalism and regionalism and the mutual reinforcement of the two Each author of this volume has made a deliberate effort to introduce and survey the developmental challenges and experiences of his or her country from a historical perspective All authors without exception have emphasized the importance and advantages in staying with ASEAN or linking up with ASEAN by China Japan and South Korea in political security economic and socio cultural terms Their papers also reveal that the self help and self strengthening mechanism emphasized by the ASEAN Plus Three process will take time to bear fruits In the meantime it seems that bilateral interactions and cooperation between ASEAN and Northeast Asian states remain to be more dominant as shown in this study One can argue that bilateral interactions are the building block of multilateralism interactions To be sure there is a deliberate effort in this study to highlight unity in diversity in East Asia in general and ASEAN in particular

Green Industrial Policy in Emerging Countries Anna Pegels, 2014-03-05 For decades governments have tried to foster industrial competitiveness and economic growth Many instruments are known to work and many lessons have been learned However humanity is increasingly feeling the effects of natural resource depletion The rate of this depletion is deeply unsustainable and it is as of yet inextricably linked to economic growth and development To preserve acceptable living conditions for future generations while at the same time creating these conditions for millions of poor in the first place we must achieve a de linking of economic activity and resource depletion This book identifies the drivers and success factors of green industrial policy which seeks to reconcile the synergies and trade offs which exist between economic and environmental goals Greening the economy is a goal which will require enormous investment As markets are currently failing to provide the required incentives for environmental sustainability governments must intervene and provide policy rents for investments in sustainability while withdrawing rents from polluting investments In this they will face the risk of political capture by interest groups and difficult choices among technologies Rent management is therefore the heart of green industrial policy and the focus of this book On top of this the country examples provided in this volume focus on the emerging powers which will have an important influence the future of our planet However the lessons learned are valuable not only for countries introducing green industrial policies for the first time but also for those under pressure to reform existing policies This book will be of interest to students researchers and policymakers in the areas of energy policy sustainable development industrial economics and ecological economics

Strangers to Neighbours Shauna Labman, Geoffrey Cameron, 2020-09-23 As a leading country in global refugee resettlement Canada operates a unique program that allows private groups and individuals to sponsor refugees This innovative approach has received growing international attention but there remains a need for a more expansive understanding of the sponsorship framework and its potential implications within Canada and across the world Strangers to Neighbours explains the origins and development of

refugee sponsorship paying particular attention to the unintended consequences and ethical dilemmas it produces for refugee policy The contributors to this collection draw upon law social science and philosophy to bring a more robust and objective perspective on Canada s historical experience with sponsorship into wider conversations about the refugee crisis and resettlement Together they present recent cases that exemplify how the model has been applied and how it functions while also analyzing the challenges that emerge in host sponsor relations This volume further examines how sponsorship has been implemented differently in countries such as the United States and Australia The first dedicated study of refugee sponsorship policy Strangers to Neighbours assembles leading scholars from a range of disciplines to consider whether Canada s system is indeed a sustainable model for the world
