**Contemporary French and Francophone Futuristic Novels** Emmanuel Buzay,2023-03-12 This book sheds a new light on the metafictional aspects of futuristic and science fiction novels at the crossroads of information and media studies possible worlds theories applied to cognitive narratology questions related to the criticism of post humanity and more broadly contemporary French and Francophone literature It examines the fictional minds of characters and their conceptions of resistance to the anticipated worlds they inhabit particularly in novels by Pierre Bordage Marie Darrieussecq Michel Houellebecq Amin Maalouf Jean Christophe Rufin Antoine Volodine and lisabeth Vonarburg It also explores how corporal postures serve as a matrix for philosophical quests in novels by Am lie Nothomb Alain Damasio and Romain Lucaleau More specifically from the fictional readers points of view it provides a critical approach to the mythologies of writing in the wake of the French philosophical tales by authors including Cyrano de Bergerac and Voltaire to question the traditionally expressed formulations of the mythologies of writing that is of the metaphors of the book the book of life nature and the world to rethink the idea of a humanity within its limits     Nietzsche and the Earth

Henk Manschot,2020-11-12 Friedrich Nietzsche 1844 1900 loved nature and his daily walks in the Swiss Mountains and by the Mediterranean Sea heavily influenced his writing and particularly his most famous book Thus Spoke Zarathustra By following the philosopher on these ramblings and reflecting on Zarathustra s Nietzsche s alter ego surprising interactions with the animals he meets on his way Henk Manschot cleverly shows how all these experiences were reflected in the philosopher s thinking on the relationship between human beings and the Earth Working at the intersection of philosophy and environmental studies Manschot presents key Nietzschean concepts as the foundations of an ecological art of living for the twenty first century In a unique contribution to the field he also introduces the concept of terra sophy which combines the notions of terra earth and sophy wisdom to contend that humans should reimagine themselves as in a reciprocal relationship with the planet For Manschot Nietzsche s thought can inspire humanity to move from a human to an Earth focused relationship to the world a shift in thought that would considerably benefit a generation facing an unprecedented ecological crisis     **Archaeology Outside the Box** Hans Barnard,2023-05-15 Archaeology Outside the Box makes

contemporary archaeology germane to the general public as well as to researchers in other disciplines In thirty one richly illustrated chapters a wide variety of projects is presented by an international group of anthropologists archaeologists architects and artists These aim to broaden the applicability of archaeology by reflecting on archaeological remains in novel ways or by addressing contemporary concerns with archaeological theory and research methods Demonstrating the fascinating and pertinent nature of archaeology the authors go far beyond its definition as a discipline that unearths objects

of ancient material culture Many chapters also provide arguments relevant to the soul searching discussions currently taking place within archaeology worldwide and accelerated by the Black Lives Matter movement and the recent Covid 19 pandemic

**Another End of the World is Possible** Pablo Servigne,Raphaël Stevens,Gauthier Chapelle,2020-11-18 The critical situation in which our planet finds itself is no longer in doubt Some things are already collapsing while others are beginning to do so increasing the possibility of a global catastrophe that would mean the end of the world as we know it As individuals we are faced with a daily deluge of bad news about the worsening situation preparing ourselves to live with years of deep uncertainty about the future of the planet and the species that inhabit it including our own How can we cope How can we project ourselves beyond the present think bigger and find ways not just to survive the collapse but to live it In this book the sequel to How Everything Can Collapse the authors show that a change of course necessarily requires an inner journey and a radical rethinking of our vision of the world Together these might enable us to remain standing during the coming storm to develop a new awareness of ourselves and of the world and to imagine new ways of living in it Perhaps then it will be possible to regenerate life from the ruins creating new alliances in differing directions with ourselves and our inner nature between humans with other living beings and with the earth on which we dwell

#### Ecopoetics of Reenchantment

Bénédicte Meillon, 2022-11-07 *Ecopoetics of Reenchantment Liminal Realism and Poetic Echoes of the Earth* tackles the reenchantment process at work in a part of contemporary ecoculture that is marked by the resurfacing of the song of the earth *topos* and of *Gaia* images Focusing on the postmodernist braiding of various indigenous and ecofeminist ontologies close readings of the animistic and totemic dimensions of the stories at hand lead to the theorizing of liminal realism a mode that shares much with magical realism but that is approached through an ecopoetic lens specifically working an interspecies kind of magic situating readers in between human and other than human worlds This book promotes a worldview based on relationships of reciprocity and symbiosis It restores our capacity for wonder together with our sensitive intelligence Liminal realism adopts a stance in between scientific mythical and poetic worldviews as it calls attention to the soundscapes odorscapes feelscapes and landscapes of the world This monograph offers an original transdisciplinary and cross Atlantic take on ecopoetics as it straddles the two academic worlds and sparks a conversation between artworks theories and studies emerging from the English speaking world as well as from Francophone contexts Entangling the materiality of language back within the flesh of the world this book and the texts under study provide insight into the fundamentally symopoietic dimension of ecopoiesis
