*Case Studies in Public Governance* June Gwee, 2013-06-19 This book makes available original case studies on how institutions developed in Singapore. Up until now these case studies have been used exclusively in Singapore to teach public governance and have been well received in the Singapore Civil Service College's milestone programmes. With this publication more will be able to access this material. Students, researchers, and policy makers can now use these case studies for pedagogy or to derive insights on Singapore's approach on governance. Designed around the theme of building institutions, the case studies also present facets of how institutions developed which are universal to management studies. These case studies highlight a core aspect in the development of institutions, namely how people and organisations change the culture of institutions, how leaders influence their organisations, and how policies define the systems that build institutions. The book contains 5 case studies, each profiling a unique sector and key institution in Singapore. They present how public agencies and leaders helped to build Singapore institutions over the last forty years. Although there are more case studies on management and strategy than public policy and administration, there is growing interest in Asian case studies and more specifically case studies on Singapore public governance. This collection of case studies on Singapore institutions provides the perspective from Singaporean case writers themselves on the role of government in Singapore's development.

**Lessons Learned in Protecting and Restoring Biodiversity** Bonnie L. Harper-Lore, Gary K. Lore, 2024-09-11 We have everything we need to begin solving this crisis with the exception of the will to act. But in America, our will to take action is itself a renewable resource. Al Gore 2002 This book explains why we should take action and how to do so, giving insights, saving time and money for future generations. Earth's biodiversity is threatened in many ways, including by climate change, invasive species, and development. Conservation response cannot be defined by political boundaries; yet lands are commonly managed at the local, state, and national levels. These authors' actions from all levels crossed lines to partner and get things done for the greater good. Expert educators, scientists, practitioners, citizens, and policymakers took action and contributed to the present volume. Conservation requires a multidisciplinary approach, and so herein some 50 disciplines inform and inspire future practices and policies. Students and professionals alike in applied ecology, wildlife biology, entomology, botany, land management, landscape architecture, journalism, ethics, and public policy benefit from these authorities' stories.
