Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

On My Own Xueli Wang, 2021-02-18 2020 ASHE Council for the Advancement of Higher Education Programs CAHEP Barbara Townsend Lecture Award 2021 Transfer Champion Catalyst Award from the National Institute for the Study of Transfer Students NISTS 2021 Outstanding Publication Award AERA Division J Publication and Research On My Own The Challenge and Promise of Building Equitable STEM Transfer Pathways is the first book of its kind to provide a detailed on the ground examination of the difficult paths curricular interpersonal and institutional that students must chart through community college The book follows 1 670 two year college students over four years as they begin STEM programs in the Midwest and documents their educational and life experiences as they moved toward or away from the prospect of transfer to a four year institution Their stories reveal that they were on their own left to navigate the pathways to transfer without meaningful institutional support The students pursued one of four pathways or momentum trajectories linear upward detoured deferred or taking a break The preexisting and lasting disparities in their access to education and financial resources their experiences with teaching and

advising and the conundrum between support from and for family among others propelled them onto different trajectories in their quest for transfer As this book makes painfully clear the current state of transfer acts as a mechanism that perpetuates and worsens inequities in educational outcomes As Xueli Wang argues to cultivate an equitable STEM transfer pathway culturally relevant and responsive supports that are accessible welcoming and validating must be put in place at the institutional level and appeal to the talent motivation and unique needs of historically marginalized students In doing so postsecondary institutions will be better positioned to fulfill their promise as an equitable pathway to bachelor s degrees and beyond

Transforming History Mary Jo Festle, 2020-04-14 Teaching history well is not just a matter of knowing history; it is a set of skills that can be developed and honed through practice. In this theoretically informed but eminently practical volume, Mary Jo Festle examines the recent explosion of research on the teaching and learning of history. Illuminated by her own work, Festle applies the concept of backward design as an organizing framework to the history classroom. She provides concrete strategies for setting up an environment that is inclusive and welcoming but still challenging and engaging. Instructors will improve their own conceptual understandings of teaching and learning issues as well as receive guidance on designing courses and implementing pedagogies consistent with what research tells us about how students learn. The book offers practical illustrations of assignments, goals, questions, grading rubrics, unit plans, and formats for peer observation that are adaptable for courses on any subject and of any size. *Transforming History* is a critical guide for higher and secondary education faculty, neophytes and longtime professionals alike working to improve student learning. **The Boy Crisis**

Warren Farrell, John Gray, 2018-03-13 What is the boy crisis? It's a crisis of education. Worldwide, boys are 50 percent less likely than girls to meet basic proficiency in reading, math, and science. It's a crisis of mental health. ADHD is on the rise. And as boys become young men, their suicide rates go from equal to girls to six times that of young women. It's a crisis of fathering. Boys are growing up with less involved fathers and are more likely to drop out of school, drink, do drugs, become delinquent, and end up in prison. It's a crisis of purpose. Boys' old sense of purpose, being a warrior, a leader, or a sole breadwinner, are fading. Many bright boys are experiencing a purpose void, feeling alienated, withdrawn, and addicted to immediate gratification. So what is The Boy Crisis? A comprehensive blueprint for what parents, teachers, and policymakers can do to help our sons become happier, healthier men and fathers and leaders worthy of our respect. **ICIE 2014 Proceedings of the 2nd International Conference on Innovation and Entrepreneurship**

Never Enough Neil Gilbert, 2016-11-11 It is said that greed fuels capitalism and socialism feeds on envy But what happens in a stable society when a successful economy generates material progress for one population sector while simultaneously creating income inequality and poverty for another sector While this has long been a classic debate for economists Neil Gilbert a social welfare theorist offers a new take In this landmark work Gilbert addresses the long standing tensions between capitalism and the progressive spirit and challenges the contemporary progressive outlook on the failures of capitalism In doing this *Never Enough* analyzes the empirical evidence for conventional claims about the real level of poverty the presumed causes and consequences of inequality the meaning and underlying dynamics of social mobility and the necessity for more social welfare spending and universal benefits The book's careful analysis suggests that it is time to resist the material definition of progress that stands so high on the current agenda and envision alternative ways for our government to advance the good society Insatiable consumption and the commodification of everyday life has dominated the last half century and is encouraged by modern capitalism because it feeds the economy and is also used as a measure of individual success But Gilbert argues that it is perhaps no longer the best way to stimulate the economy *Never Enough* also challenges the prevailing assumptions about the decline of middle class prosperity opportunity and material well being in the United States and in other post industrial nations In a careful reading of the evidence and a critical analysis of its implications Gilbert demonstrates the extent to which the customary progressive claims about the severity of poverty inequality social mobility and the benefits of universalism not only distort the empirical reality of modern life in an era of abundance but confounds efforts to help those most in need

Creativity and Technology in Mathematics Education Viktor Freiman, Janet Lynne Tassell, 2018-09-03 This volume provides new insights on creativity while focusing on innovative methodological approaches in research and practice of integrating technological tools and environments in mathematics teaching and learning This work is being built on the discussions at the mini symposium on

Creativity and Technology at the International Conference on Mathematical Creativity and Giftedness ICMCG in Denver USA 2014 and other contributions to the topic The book emphasizes a diversity of views a variety of contexts angles and cultures of thought as well as mathematical and educational practices The authors of each chapter explore the potential of technology to foster creative and divergent mathematical thinking problem solving and problem posing creative use of dynamic multimodal and interactive software by teachers and learners as well as other digital media and tools while widening and enriching transdisciplinary and interdisciplinary connections in mathematics classroom Along with ground breaking innovative approaches the book aims to provide researchers and practitioners with new paths for diversification of opportunities for all students to become more creative and innovative mathematics learners A framework for dynamic learning conditions of leveraging mathematical creativity with technology is an outcome of the book as well Individual Differences in Arithmetical Development Ann Dowker,Bert De Smedt,Annemie Desoete,2020-01-03 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org/about/contact
