The Armed Forces Covenant in action? Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 3.5 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the

MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country ICEL2012- 7th International Conference on E-Learning Paul Lam,2011 On Your Mark Thomas R. Guskey,2014-08-05 Create and sustain a learning environment where students thrive and stakeholders are accurately informed of student progress Clarify the purpose of grades craft a vision statement aligned with this purpose and discover research based strategies to implement effective grading and reporting practices Identify policies and practices that render grading inaccurate and understand the role grades play in students future success and opportunities Education under Siege Mortimore, Peter,2013-09-23 At a time when education is considered crucial to a country s economic success recent UK governments have insisted their reforms are the only way to make England s system world class Yet pupils are tested rather than educated teachers bullied rather than trusted and parents cast as winners or losers in a gamble for school places Education under siege considers the English education system as it is and as it might be In a highly accessible style Peter Mortimore an author with wide experience of the education sector both in the UK and abroad identifies the current system s strengths and weaknesses He concludes that England has some of the best teachers in the world but one of the most muddled systems Challenging the government s view that there is no alternative he proposes radical changes to help all schools become good schools They include a system of schools receiving a fair balance of pupils who learn easily and those who do not ensuring a more even spread of effective teachers as well as banning league tables outlawing selection opening up faith schools and integrating private schools into the state system In the final chapter he asks readers who share his concerns to demand that the politicians alter course The book will appeal to parents education students and teachers as well as everyone interested in the future education of our children **Mathematics Education in the Early Years** Tamsin Meaney,Ola Helenius,Maria L. Johansson,Troels Lange,Anna Wernberg,2016-01-22 This book presents chapters based on papers presented at the second POEM conference on early mathematics learning These chapters broaden the discussion about mathematics education in early childhood by exploring the debate about construction versus instruction Specific sections investigate the teaching and learning of mathematical processes and mathematical content early childhood teacher development transitions for young children between home and preschool between home and school and between preschool and school The chapters use a range of innovative theoretical and methodological approaches which will form an interesting basis for future research in this area **Sri Lanka Education Sector Assessment** Halil Dundar,Benoit Millot,Michelle Riboud,Mari Shoji,Harsha Aturupane,Sangeeta Goyal,Dhushyanth Raju,2017-06-16 A country s education system plays a pivotal role in promoting economic growth and shared prosperity Sri Lanka has enjoyed high school attainment and enrollment rates for several decades However it stillfaces major challenges in the education sector and these challenges undermine the country s

inclusive growth goal and its ambition to become a competitive upper middle income country. The authors of Sri Lanka Education Sector Assessment: Achievements, Challenges, and Policy Options offer a thorough review of Sri Lanka's education sector from early childhood education through higher education. With this book, they attempt to answer three questions: How is Sri Lanka's education system performing, especially with respect to participation rates, learning outcomes, and labor market outcomes? How can the country address the challenges at each stage of the education process, taking into account both country and international experience and also best practices? Which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them. To attain inclusive growth and become globally competitive, Sri Lanka needs to embark on integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary, and postsecondary education must be aligned to meet the increasingly complex education and skill requirements.
