which also addresses anyone with interests in quantitative approaches to humanities Topics and Trends in Current Statistics Education Research Gail Burrill, Dani Ben-Zvi, 2018-12-29 This book focuses on international research in statistics education providing a solid understanding of the challenges in learning statistics It presents the teaching and learning of statistics in various contexts including designed settings for young children students in formal schooling tertiary level students and teacher professional development The book describes research on what to teach and platforms for delivering content curriculum strategies on how to teach for deep understanding and includes several chapters on developing conceptual understanding pedagogy and technology teacher knowledge and beliefs and the challenges teachers and students face when they solve statistical problems reasoning and thinking This new research in the field offers critical insights for college instructors classroom teachers curriculum designers researchers in mathematics and statistics education as well as policy makers and newcomers to the field of statistics education Statistics has become one of the key areas of study in the modern world of information and big data The dramatic increase in demand for learning statistics in all disciplines is accompanied by tremendous growth in research in statistics education Increasingly countries are teaching more quantitative reasoning and statistics at lower and lower grade levels within mathematics science and across many content areas Research has revealed the many challenges in helping learners develop statistical literacy reasoning and thinking and new curricula and technology tools show promise in facilitating the achievement of these desired outcomes *Surviving and Thriving in the Secondary School* Susan Capel, Julia Lawrence, Marilyn Leask, Sarah Younie, 2019-10-01 With an emphasis on developing a reflective resilient approach that will ensure both effective teaching and teacher well being *Surviving and Thriving in the Secondary School* covers key issues that may be encountered in the day to day practice of teaching in the secondary school With evidence based practice at the forefront this volume allows new teachers to avoid common pitfalls of teaching and it will help provide a new found confidence within the classroom Including a wide range of tasks that will help guide and demonstrate successful practice this book covers topics and concerns such as Building relationships within teaching Managing and responding to change Becoming an inclusive educator Working to improve classroom climate and pupil behaviour Assessment homework and marking Inclusion of digital technologies and ICT Looking after yourself and your professional development *Surviving and Thriving in the Secondary School* can be utilised to help support and provide ideas on specific areas of concern or it can be read as a continuing professional development CPD companion allowing practice to be developed and refined Written by world renown experts in the field this volume provides support for all newly qualified teachers and is an essential resource for the first year of teaching and beyond *Mathematical Competencies in the Digital Era* Uffe Thomas Jankvist, Eirini Geraniou, 2023-02-20 This book focuses on the potential interplay between two distinct yet related paradigm shifts in mathematics education drawing on the notion of networking of theories through illustrative case studies from the Danish educational system and beyond The first paradigm shift is the massive introduction of digital

technology in the teaching and learning of the subject the second is a shift from the traditional focusing on mastering of skills and knowledge to being concerned with the possession and development of mathematical competencies This book builds on the Danish KOM Competencies and the Learning of Mathematics project which sources its description of mathematical mastery primarily on the notion of a mathematical competency rather than on lists of topics concepts and results This allows for an overarching framework which captures the perspectives of mathematics teaching and learning at whichever educational level While the KOM framework does not in detail address the role of digital technologies in relation to its description of different types of mathematical competencies etc the chapters of this book set out to do exactly this while in the process also drawing on a selection of other theoretical constructs and frameworks from mathematics education research Starting with introductory chapters by key researchers in the area the book brings forth chapters for each of the KOM framework s eight mathematical competencies authored by Nordic researchers in combination with international scholars The KOM framework also operates with three types of overview and judgement which are specifically addressed in relation to the role of digital technologies in the third part of the book The fourth and final part of the book broadens the scene and provides chapters of a more perspective nature in relation to mathematical competencies in the digital era The book s preface is by Susanne Prediger
