Foundation for Large Scale Computations of Nonlinear Material Behavior held under the auspices of the National Science Foundation NSF and the Defense Advance Research Projects Agency DARPA at Northwestern University October 24-26 1983

The main objective of this workshop was to provide a forum for the exchange of information and views on major issues relating to the fundamentals of characterizing the inelastic constitutive material behavior

Comments on the Aims of the Workshop by Drs William Snowden and Thomas Bache pp 1-5 outline reasons for holding this workshop and provide further background

The format of the workshop was designed to optimize the interaction between researchers whose primary interest is material characterization and numerical analysts whose primary interest is the development and practical use of large computer codes

The program of the workshop and a list of the workshop participants are found at the end of these proceedings
