

In any hi-fi system, it is the loudspeaker which ultimately determines the quality of sound reproduction. The intricate nature of its operation, namely the complex process of transforming electrical energy into acoustical output, results in continued controversy between designers.

It is as a result of conflicting design philosophies that most listeners hear marked variations between various manufacturers' products. Different designers emphasize different aspects of loudspeaker characteristics. For example, some speakers offer high efficiency to the detriment of accuracy. Others produce smoothness and low coloration but fail to generate adequate sound levels. Others impress on initial listening but, in the longer term, produce fatigue and become irritating.

The Mission design team rejects such compromises and has optimised the total system. The result is a range of loudspeakers capable of reproducing all forms of sounds accurately, with very low distortion, excellent efficiency and with high power handling potential. The speakers themselves are neutral in that they have no characteristic tonality. They reproduce all types of musical programme with maximum fidelity to the original material. Above all, they are capable of attaining, without distortion, sound levels with the realism of any live musical performance.

## Mission 700

Acknowledged as the world's finest compact speaker system by technical press throughout Europe, Britain, Canada and the U.S.A., the Mission 700 remains our most sought after product.

And no, it's not upside-down! There are many complex reasons for the reversed positions of Mission's new 8" driver and the dome tweeter. There are also many other less visible technical innovations incorporated in this design, most of which are beyond the scope of discussion here. Suffice it to say that never before did a speaker system of this size and price offer the qualities and capabilities of our baby 700.

Recommended amplifiers: 15W - 80W per channel.

## Mission 717

The 717 is a brand new addition to the Mission range. Here, the greatest challenge to our design team was to ensure a significant advance over the 700, which has presented genuine competition to many models costing substantially more.

Mission 717's will now set a completely new standard of quality in their price category and will be one of our most formidable products for the 1980's.

Mission 717 offers a rare combination of accuracy, low coloration, high dynamic range, high efficiency and high power handling, and will suit amplifiers ranging from 15W - 100W per channel.
