Gauteng Business Studies Preliminary 2014 Paper:

Routledge Handbook of Food Waste Christian Reynolds, Tammara Soma, Charlotte Spring, Jordon Lazell, 2020-01-13 This comprehensive handbook represents a definitive state of the current art and science of food waste from multiple perspectives. The issue of food waste has emerged in recent years as a major global problem. Recent research has enabled greater understanding and measurement of loss and waste throughout food supply chains, shedding light on contributing factors and practical solutions. This book includes perspectives and disciplines ranging from agriculture, food science, industrial ecology, history, economics, consumer behaviour, geography, theology, planning, sociology, and environmental policy, among others. The Routledge Handbook of Food Waste addresses new and ongoing debates around systemic causes and solutions, including behaviour change, social innovation, new technologies, spirituality, redistribution, animal feed, and activism. The chapters describe and evaluate country case studies, waste management, treatment, prevention, and reduction approaches, and compares research methodologies for better understanding food wastage. This book is essential reading for the growing number of food waste scholars, practitioners, and policy makers interested in researching, theorising, debating, and solving the multifaceted phenomenon of food waste.

The African National Congress and the Regeneration of Political Power Susan Booysen, 2011-11-11 The African National Congress is light years beyond the liberation movement of old. It remains a juggernaut, but its control and dominance are no longer watertight. The ANC lives the contradictions of weaknesses, cracks, and factions while retaining its colossal status. As a party movement, it draws on its liberation credentials and extracts immense power from its deep anchorage in South Africa's people. It is immersed in electoral politics that marks the state of its overwhelming power cyclically. As government, the ANC is the object of protest, but not protest designed to bring the ruling party to its knees. The ANC is in command of the state yet fails to definitively counter the deficits that make South Africa's democracy seem so diluted. Its incredulous and thus far trusting supporters condemn but only rarely punish deployees who do not pass through the eye of the needle. The ANC and the Regeneration of Political Power unpacks these contradictions. It focuses on four faces of the ANC's political power: the organisation, the people, political parties, and elections, and policy and government, and explores how the ANC has acted since 1994 to continuously regenerate its power. By 2011-12, the power configurations around the ANC were converging to a conjuncture holding vexing uncertainties. This book presents insights into how South African politics, in many ways synonymous with the politics of the ANC, is likely to unfold in years and possibly decades to come.
