

AQA GCSE Chemistry Coursework

(ISA – Independent Skills Investigation)

Notes

- Coursework makes up 25% of GCSE Chemistry- the same as Unit 1.
- Chemistry coursework follows the same format as Biology coursework.
- The coursework task is divided into 5 stages

Stage 1 Planning. You will be given the topic and context of the coursework and instructed to plan an investigation on that topic and write an hypothesis. You should complete a "Candidate Research Notes form". An example of a one of these for a biology experiment is on pages 4+5.

Stage 2 Reporting on planning research. In lesson time, in exam conditions you will have to complete Section 1 of the ISA using your "Candidate Research Notes form" only. This will include stating and explaining your hypothesis, research into how to test the hypothesis, a detailed plan and why that one was chosen rather than others, possible hazards, a blank table.

Stage 3 Practical work. Individually or in pairs you will collect the data. (If your teacher decides the experiment you have planned is unsafe or impractical then you will be given a different method).

Stage 4 Processing data. This involves completing the table that you drew in an earlier lesson and plot a graph of the results. This is completed in exam conditions.

Stage 5 Analysing results. Section 2 of the written ISA – you will have to answer questions about your results and other results that you are supplied to you. This is also completed in exam conditions.

During the coursework it is important to use the correct language for the apparatus that you will use and for scientific terminology. Make sure you know the name of every piece of apparatus that you use in practical lessons.
