Wall Oven

How to set the oven for baking or roasting

Mode selector knob

Temperature control knob

Oven control knob

Single oven controls shown.

- 1 Turn the mode selector knob to MANUAL.
- 2 Using the temperature control knob, set the desired temperature.
- 3 Turn the oven control knob to BAKE.

A cooling fan will automatically turn on to cool internal parts. This is normal, and the fan may continue to run even after the oven is turned off.

The oven ON light and the oven interior lights turn on and remain on until the oven control knob has been turned to OFF.

The PREHEAT light will come on and stay on until the oven temperature reaches the pre-set temperature. When the light goes off, foods with recipes requiring a preheated oven should be placed in the oven. This light will CYCLE on and off during the remainder of the cooking process.

NOTE: These lights will not immediately come on if the mode selector knob is turned to TIMED.

- 4 Check the food for doneness at the minimum time on the recipe. Cook longer if necessary.

- 5 Turn the oven control knob to OFF when baking is finished.

When roasting use the A or B shelf position.

NOTE: When roasting, check the weight of the meat. Place the meat fat side up, or for poultry, breast side up, on the roasting grid in a shallow pan. The melting fat will baste the meat. Select a pan as close to the size of the meat as possible. (The broiler pan with grid is a good pan for this.)

Type of Food	Shelf Position
