Geography 2014 Grade 11 November:

Geography Education for Global Understanding Ali Demirci, Rafael de Miguel González, Sarah Witham Bednarz, 2018-04-26 This book presents the core concepts of geographical education as a means of understanding global issues from a spatial perspective. It treats education supported by high standards, approaches, methodologies, and resources as essential in exploring the interactions of the world's human and environmental systems at local, regional, and global scales embedded in the nature of the discipline of geography. It covers topics such as climate change, sustainable development goals, geopolitics in an uncertain world, global crisis, and population flows, which are of great interest to geography researchers and social sciences educators who want to explore the complexity of contemporary societies. Highly respected scholars in geography education answer questions on key topics and explain how global understanding is considered in K-12 education in significant countries around the globe. The book discusses factors such as the Internet, social media, virtual globes, and other technological developments that provide insights into and visualization in real time of the intensity of relationships between different countries and regions of the earth. It also examines how this does not always lead to empathy with other political, cultural, social, and religious values. Terrorism, threats, and armed conflicts are also essential features of the global world. This book opens the dialogue for global understanding as a great opportunity for teachers, educators, scholars, and policy makers to better equip students and future citizens to deal with global issues. As a collection, it pulls together a diverse group of scholars to share their research and experiences. The volume endeavors to address topics including the nature and purpose of Holocaust education, how our understanding of the Holocaust has changed, and resources we can use with learners. These themes are consistent across the chapters, making for a comprehensive exploration of learning through the Holocaust today and in the future. *GIScience Teaching and Learning Perspectives* Shivanand Balram, James Boxall, 2019-01-31 This volume uniquely links educational theories and the practice of GIScience in higher education contexts to guide classroom practice, present effective practical implementations from peers, and provide resources and strategies for effective teaching methods. The book offers a comprehensive exploration of GIScience education, including current trends and future educational needs in GIScience, and will act as a resource to prepare learners for a world that demands more intensive investment in present-day education and technological literacy. Additionally, the indirect benefit of merging the fragmented literature on GIScience literacy will provide a basis to examine common techniques and enable a new wave of research more rooted in learning.

Psychosocial Skills and School Systems in the 21st Century Anastasiya A Lipnevich, Franzis Preckel, Richard D. Roberts, 2016-04-02 This book provides a comprehensive overview and in depth analysis of research on psychosocial skills examining both theory and areas of application It discusses students psychosocial skills both as components of academic success and desired educational outcomes in grades K through 12 The book describes an organizing framework for psychosocial skills and examines a range of specific constructs that includes achievement motivation self efficacy creativity emotional intelligence resilience and the need for cognition In addition it reviews specific school based interventions and examines issues that concern the malleability of psychosocial skills It addresses issues relating to the integration of psychosocial skills into school curriculum as well as large scale assessment policies Topics featured in this book include Development of psychosocial skills in grades K 12 Assessment of psychosocial skills Conscientiousness in education and its relation to meaningful educational outcomes Creativity in schools including theory assessment and interventions Academic emotions and their regulation through emotional intelligence Resilience and school based programs aimed at enhancing it Psychosocial Skills and School Systems in the 21st Century is a must have resource for researchers graduate students clinicians mental health professionals and policymakers in child and school psychology educational policy and politics public health social work developmental psychology and educational psychology *Education at a Glance 2023 Sources, Methodologies and Technical Notes* OECD, 2023-09-12 This publication provides additional reference material for Education at a Glance 2023 the authoritative source for data on the state of education around the world It provides guidance on the data and methodology used to calculate each indicator It also contains references to the sources and specific notes for each country [The Knowledge Gap](#) Natalie Wexler, 2019-08-06 Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America s education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country s frustrating lack of progress when it comes to providing every child with a quality education The problem wasn t one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum s intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff s *The Prize* and Dana Goldstein s *The Teacher Wars* Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware But *The Knowledge Gap* isn t just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have

come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention *The Rise and Fall of Civic Education* Michael Learn,2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it *The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape* investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America s divisive politics fight to control the narrative of the disciplines within social studies *Social Studies Education in East Asian Contexts* Kerry J. Kennedy,2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices In an increasingly volatile and unpredictable world the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it This is particularly important in East Asia where strong economic growth long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts This book with its team of regional authors shows how different societies in the region are dealing with these challenges and what can be expected from future citizens The book will appeal to policy makers researchers and teachers interested in the current state of social studies education in East Asian societies

Peacebuilding and Friction Annika Björkdahl,Kristine Höglund,Gearoid Millar,Jair van der Lijn,Willemijn Verkoren,2016-03-02 This book aims to understand the processes and outcomes that arise from frictional encounters in peacebuilding when global and local forces meet Building a sustainable peace after violent conflict is a process that entails competing ideas political contestation and transformation of power relations This volume develops the concept of friction to better analyse the interplay between global ideas actors and practices and their local counterparts The chapters examine efforts undertaken to promote sustainable peace in a variety of locations such as Cambodia Sri Lanka Afghanistan and Sierra Leone These case analyses provide a nuanced understanding not simply of local processes or of the hybrid or mixed agencies ideas and processes that are generated but of the complex interactions that unfold between all of these elements in the

context of peacebuilding intervention The analyses demonstrate how the ambivalent relationship between global and local actors leads to unintended and sometimes counterproductive results of peacebuilding interventions The approach of this book with its focus on friction as a conceptual tool advances the peacebuilding research agenda and adds to two ongoing debates in the peacebuilding field the debate on hybridity and the debate on local agency and local ownership In analysing frictional encounters this volume prepares the ground for a better understanding of the mixed impact peace initiatives have on post conflict societies This book will be of much interest to students of peacebuilding conflict resolution security studies and international relations in general
