10. If the government's policy is to increase the level of the tax on cigarettes, how would this increase affect the cigarette market? Explain.

The following table shows the results of the regression analysis for the dependent variable "Number of children in the household" (Table 1). The results show that the number of children in the household is positively related to the number of children in the neighborhood, the number of children in the family, and the number of children in the community. The results also show that the number of children in the household is negatively related to the number of children in the neighborhood, the number of children in the family, and the number of children in the community.
