of that IBM is putting huge resources behind the platform and probably has the highest concentration of Swift developers outside of Cupertino Kitura out performs Vapor in benchmarks including having significantly lower memory usage and latency Most importantly Kitura is very similar to Express js which is a massively popular development framework for JavaScript This lets existing web developers migrate to Swift more easily Even if Kitura isn t your preferred choice the Swift Server APIs work group are looking at ways to build shared APIs for standard server functionality so hopefully you ll learn lots of transferrable skills
