

In a manufacturing process 25% of articles are thought to be defective. Articles are produced in batches of 20

- (a) A batch is selected at random. Using a 5% significance level, find the critical region for a two tailed test that the probability of an article chosen at random being defective is 0.25

You should state the probability in each tail which should be as close as possible to 0.025

(5)

The manufacturer changes the production process to try to reduce the number of defective articles. She then chooses a batch at random and discovers there are 3 defective articles.

- (b) Test at the 5% level of significance whether or not there is evidence that the changes to the process have reduced the percentage of defective articles. State your hypotheses clearly.

Trauma and Recovery on War's Border Kathleen Alden, MD, Nancy Murakami, LCSW, 2015-04-07 An increasing number of students and professionals are choosing to travel the globe to engage with the realities of trauma and human suffering through mental health aid But in the field of global mental health good intentions are not enough to ensure good training development and care The risk of harm is real when outsiders deliver mental health aid in culturally inappropriate and otherwise naive ways This book based on the experiences of the co editors and their colleagues at Burma Border Projects BBP a nonprofit organization dedicated to the mental health and psychosocial well being of the displaced people of Burma sets out global mental health theory allied with local perspectives experiences real life challenges strengths and best practices Topics include assessment and intervention protocols vulnerable groups and the special challenges they present and supervision and evaluation programs An introduction by the editors establishes the political and health contexts for the volume Written in a style appropriate for academic audiences and lay readers this book will serve as a fundamental text for clinicians interns volunteers and researchers who work in regions of the world that have suffered the violence of war forced displacement human rights violations poverty and oppression

Charros Laura R. Barraclough, 2019-06-04 In the American imagination no figure is more central to national identity and the nation's origin story than the cowboy Yet the Americans and Europeans who settled the U S West learned virtually everything they knew about ranching from the indigenous and Mexican horsemen who already inhabited the region The charro a skilled elite and landowning horseman was an especially powerful symbol of Mexican masculinity and nationalism After the 1930s Mexican Americans in cities across the U S West embraced the figure as a way to challenge their segregation exploitation and marginalization from core narratives of American identity In this definitive history Laura R Barraclough shows how Mexican Americans have used the charro in the service of civil rights cultural citizenship and place making Focusing on a range of U S cities Charros traces the evolution of the original cowboy through mixed triumphs and hostile backlashes revealing him to be a crucial agent in the production of U S Mexican and border cultures as well as a guiding force for Mexican American identity and social movements Biogeochemical, ecological and biophysical dynamics in the kuroshio, oyashio and their extension regions Guangchao Zhuang, Makio Honda, Jing Zhang, Meixun Zhao, Fei Chai, 2023-08-23

Focus On: 100 Most Popular Television Series by Universal Television Wikipedia contributors, **Landslides and Engineered Slopes. Experience, Theory and Practice** Stefano Aversa, Leonardo Cascini, Luciano Picarelli, Claudio Scavia, 2018-04-17 Landslides and Engineered Slopes Experience Theory and Practice contains the invited lectures and all papers presented at the 12th International Symposium on Landslides Naples Italy 12-19 June 2016 The book aims to emphasize the relationship between landslides and other natural hazards Hence three of the main sessions focus on Volcanic induced landslides Earthquake induced landslides and Weather induced landslides respectively while the fourth main session deals with Human induced landslides Some papers presented in a

special session devoted to Subareal and submarine landslide processes and hazard and in a Young Session complete the books Landslides and Engineered Slopes Experience Theory and Practice underlines the importance of the classic approach of modern science which moves from experience to theory as the basic instrument to study landslides Experience is the key to understand the natural phenomena focusing on all the factors that play a major role Theory is the instrument to manage the data provided by experience following a mathematical approach this allows not only to clarify the nature and the deep causes of phenomena but mostly to predict future and if required manage similar events Practical benefits from the results of theory to protect people and man made works Landslides and Engineered Slopes Experience Theory and Practice is useful to scientists and practitioners working in the areas of rock and soil mechanics geotechnical engineering engineering geology and geology

Dyslexia and Design & Technology Frances Ranaldi, 2013-02-01 This practical guide will help busy teachers and learning support staff present the design technology curriculum in a way that will make it accessible to dyslexic pupils and create a more flexible and positive learning environment Drawing upon her experience as a designer teacher and mother of two dyslexic children and also as a dyslexic learner herself the author dispels myths about the difficulties faced by dyslexic learners explains the variety of learning difficulties that they experience highlights the help that they need to access their potential gives an insight into issues relating to craft and design offers flexible strategies and solutions that can be used in the classroom or workshop
