Rover and by third party companies along with many of the prototype and concept vehicles produced over the years There is a focus on the technical aspects of the vehicles and the specifications of all the production variants made are detailed The Land Rover has been used in various expeditions since the early days and this book also covers some of the Land Rover products used for these as well as the vehicles used for competitions such as the Camel Trophy and G4 challenges These include those produced by Bowler which is now owned by Jaguar Land Rover Whether you are new to the Land Rover or a seasoned enthusiast there will be something for you on the pages of this highly illustrated informative book

Designing Interaction and Interfaces for Automated Vehicles Neville Stanton,Kirsten M. A. Revell,Patrick Langdon,2021-03-10

Driving automation and autonomy are already upon us and the problems that were predicted twenty years ago are beginning to appear These problems include shortfalls in expected benefits equipment unreliability driver skill fade and error inducing equipment designs Designing Interaction and Interfaces for Automated Vehicles User Centred Ecological Design and Testing investigates the difficult problem of how to interface drivers with automated vehicles by offering an inclusive human centred design process that focusses on human variability and capability in interaction with interfaces This book introduces a novel method that combines both systems thinking and inclusive user centred design It models driver interaction provides design specifications concept designs and the results of studies in simulators on the test track and in road going vehicles This book is for designers of systems interfaces interactions UX Human Factors and Ergonomics researchers and practitioners involved with systems engineering and automotive academics _ In this book Prof Stanton and colleagues show how Human Factors methods can be applied to the tricky problem of interfacing human drivers with vehicle automation They have developed an approach to designing the human automation interaction for the handovers between the driver and the vehicle This approach has been tested in driving simulators and most interestingly in real vehicles on British motorways The approach called User Centred Ecological Interface Design has been validated against driver behaviour and used to support their ongoing work on vehicle automation I highly recommend this book for anyone interested or involved in designing human automation
