The National Agricultural Directory 2009, 2009 *The California Highway Patrolman*, 1968 **Chronic Ambulatory Peritoneal Dialysis (CAPD) and Chronic Cycling Peritoneal Dialysis (CCPD) in Children** Richard N. Fine, 2012-12-06

During the past decade there has been a renaissance of interest in the use of peritoneal dialysis as a primary dialytic modality for the treatment of children with end stage renal disease ESRD The development of the technique of continuous ambulatory peritoneal dialysis CAPD and continuous cycling peritoneal dialysis CCPD has markedly changed the approach to children requiring dialytic therapy The availability of these techniques has facilitated prolonged dialysis in infants and has for the first time given pediatric nephrologists in many areas of the world an opportunity to consider dialysis in children afflicted with ESRD I have enlisted the collaboration of colleagues from Europe South America Canada and the United States in compiling this multidisciplinary text which hopefully contains the most up to date comprehensive information regarding the use of CAPD CCPD in children It is my hope that every nephrologist pediatric and adult nephrology nurse pediatric and adult nephrology technician or allied health professional dealing with children who require these therapeutic modalities will be able to resolve immediately any confounding clinical or technical issues that arise by using the information contained in this text Demographic data on the use of CAPD CCPD in children in Europe is provided from the EDTA Registry and in the United States from the National Peritoneal Dialysis Registry The particular problems encountered in the use of CAPD in children in developing countries is detailed by Dr Grunberg and his colleagues in Uruguay
